

The background features a blurred image of server racks in a data center, overlaid with vertical columns of alphanumeric characters in various colors (blue, green, yellow, red). The overall aesthetic is modern and technological, with geometric shapes in red, blue, and black framing the central image.

DATWYLER

Datwyler IT Infra is an international company with its headquarters in Switzerland and affiliates in Europe, the Middle East and Asia. Datwyler enables organizations around the world to run their IT/OT infrastructures seamlessly and scale their business with ease. The well-established company which was founded more than 100 years ago has successfully acted as a supplier of innovative system solutions and products for data centres, fibre networks, and intelligent buildings as well as the lead or main contractor who covers the whole value chain in these markets.

MILESTONES

1915 Adolf Dätwyler founded the company and began producing electrical conductors using aluminium.

1926 The production of telephone cables began.

1944 The production of high-frequency cables began.

1973 Kaved Ltd. was acquired. The value chain was extended by adding cable harnessing. Datwyler produced the first flat cable for lifts with up to 400 metre shaft height.

1986 The production of fibre optic cables began.

1987 "Uninet" (today: "Datwyler CU") data cables and the future-proof concept for structured building cabling were introduced

1991 Datwyler safety cable became the first fire safety cable in the world to successfully pass E90 testing as per DIN 4102-12.

1998 International expansion:
Datwyler entered the Chinese market.

2002 Optofil Safety (today: "Datwyler FO Universal ... Safety") became the first metal-free fibre optic cable with E30 circuit integrity as per DIN 4102-12.

2005 Datwyler significantly expanded its international distribution network, e.g. in Eastern Europe and the Middle East.

2008 Datwyler introduced pre-assembled trunk (multiple) cables and high-density systems that specifically address the demand for efficient data centre cabling.

2009 Datwyler started to offer complete turnkey solutions for data networks, data centres and FTTx networks.

2010 Datwyler became full service general contractor for several FTTx projects in Switzerland. Introduction of FTTH special cables and wall outlets.

2011 Datwyler opened a branch in Dubai.

2012 Introduction of the "Datwyler Data Centre Solution". Renaming to "Datwyler Cabling Solutions AG" in Switzerland (1 Nov 2012).

2013 Acquisition by Pema Holding AG.
Introduction of the first Category 8 data cable "CU 8203 4P".

2015 Datwyler introduced "FO Outdoor wbKT Micro Combi", the first mini hybrid cable for NGN and NGA networks.

2016 The Cat.7 data cable "CU 7000 4P Home" with a diameter of only 5.8 mm and the "FO Outdoor wbKT S-Micro 12x24" with a diameter of only 10.4 mm were introduced.

2018 Datwyler opened a branch in Italy.

2019 Datwyler opened a branch in the Czech Republic. Introduction of the "High-Density Data Centre Solution" (HD-DCS) and the Micro and Mini Data Centres.

2020 The "FO Universal DLTS" cable family was introduced. Rebranding: "Datwyler Cabling Solutions" became "Datwyler IT Infra".

QUALITY

QUALITY SERVICE

At Datwyler, we keep all the major components for our system solutions in stock at all times, and can therefore guarantee fast delivery. We can answer any query promptly and efficiently, with careful consideration towards the current and future requirements of our clients. Our engineering teams deliver projects on time and within budget, and to the correct specification.

STATE OF THE ART TECHNOLOGY

Datwyler invests year-on-year in improved material and process technologies, production equipment and test methods. This is why our system solutions regularly exceed industry expectations. We set new standards.

QUALITY AS A CONSTANT MISSION – WITHOUT COMPROMISE

In practice, the important functions that our system solutions provide, demand the highest levels of safety and reliability. We therefore test and validate every product and system solution using the most stringent quality-control. Quality without compromise is a constant expectation for all of our employees. It is also our guarantee to our customers.

QUALITY ASSURANCE

Our management system is ISO 9001, ISO 14001 and BS 18001 certified.

WE SURPASS ALL INDUSTRY STANDARDS

Within the development phase of every product, Datwyler defines quality specifications that go beyond the usual industry standards. In addition to general quality-control inspections, our products undergo application-specific testing. With the help of qualified specialists, Datwyler has developed a series of sophisticated test machines specifically for this purpose. We use these to measure every type of cable and every system component against our own rigorous quality specifications. Such extreme testing procedures ensure that all Datwyler's systems and solutions will maintain their integrity, even under the most demanding conditions.

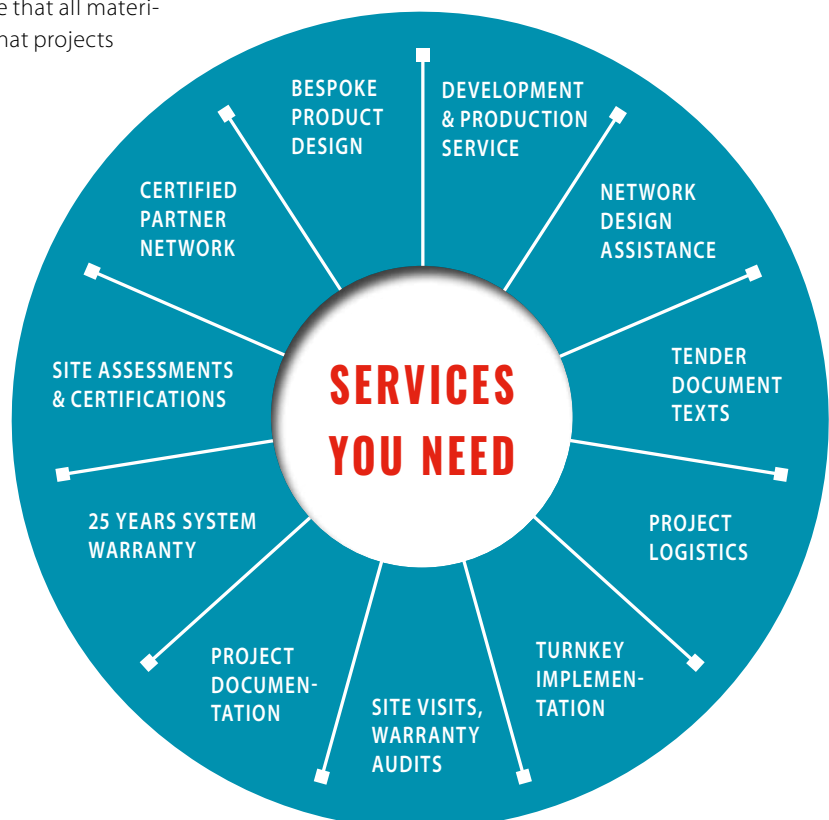

TURN-KEY PROJECTS

Datwyler serves as your single global contact for IT infrastructure projects. We will ensure quality standards adhered to, and that projects are delivered on time and on budget. Through our certified partner network we are able to efficiently roll-out complete solutions and multi-site projects all over the world. Our transparent project reporting provides our clients with the ability to know the exact status of the project at any time. Comprehensive documentation further ensures the quality of the work.

Material logistics plays an important part in multi-site projects. Together with our logistics partners we ensure that all materials are on-site precisely on schedule, in order that projects can be delivered on time.

SERVICES

Datwyler offers a comprehensive range of services that cover the whole life-cycle of your cabling and IT infrastructure solution. These services that we offer in close co-operation with our certified partners include consulting, engineering, implementation and maintenance:

THE EUROPEAN CONSTRUCTION PRODUCTS REGULATION (CPR) EU 305/2011

Since 1st July 2017 cable manufacturers have been obliged to test power cables and lines as well as control and communication cables permanently incorporated in construction works (fixed installation) for reaction to fire performance requirements in accordance with the new harmonised Standard EN 50575, and to classify and market them with a Declaration of Performances (DoP). The import of products from countries outside Europe makes the importer - according to the CPR - a manufacturer who is responsible for the correct product certification and for putting it on the market.

The EU Commission has approved European test laboratories as notified bodies to test and evaluate the reaction to fire performance of cables for this additional task. The product characteristics of a "construction product" cable must be determined and confirmed by a notified body. By the same token the manufacturer's production facility must be subject to ongoing production control by the notified body.

Following product assessment and production monitoring the notified body authorises the manufacturer to deliver his products with the CE mark and to issue a DoP.

The following criteria are evaluated when testing is carried out in compliance with EN 50575:

- Heat of combustion
- Thermal release
- Vertical flame propagation
- Smoke generation
- Flaming droplets/particles of plastics materials which can contribute to fire propagation
- Acidity

The results of this test should be assigned to the following seven cable classes (Euroclasses):

Main class	Description
A _{ca}	Non-flammable, no contribution to fire; products such as mineral-insulated cables and lines
B1 _{ca}	Low flammability, very limited contribution to fire
B2 _{ca} , C _{ca}	Very limited or limited contribution to fire; cables/ lines without continuous flame propagation; limited fire development and thermal release rate
D _{ca}	Acceptable contribution to fire; products with continuous fire propagation; moderate fire development and thermal release rate
E _{ca}	Normally flammable; cables and lines with acceptable fire behaviour which have flame-retardant characteristics when exposed to a small pilot flame
F _{ca}	Easily flammable; this cable can ignite when exposed to a small flame

Additional classifications are to be determined for classes B1_{ca} to D_{ca}. The fire-critical parameters have been identified as smoke generation, flaming droplets of cable material and the acidity of the combustion gases:

Additional classes for smoke generation in cables:

s1	slight smoke generation
s1a	s1 with visibility over 80%
s1b	s1 with visibility between 60% to 80%
s2	moderate smoke generation
s3	severe smoke generation

Additional classes for flaming droplets/particles in cables:

d0	no flaming droplets
d1	short-lived flaming droplets
d2	persistent flaming droplets

Additional classes for acidity in cables:

a1	slightly corrosive flue gases
a2	moderately corrosive flue gases
a3	severely corrosive flue gases

You will find up-to-date information on the classification of our relevant cables and lines in the product data sheets. Declarations of Performance have been provided with the delivery documentation since 1st July 2017. If a copy of the Declaration of Performances is needed it can be requested via the Datwyler contact address of the relevant country. Declarations of Performance are also available for downloading on the Datwyler website.

The European Construction Products Regulation (CPR) regulates the placing of construction products on the European market – but not their use in construction work. The selection and use of construction products are the responsibility of the European Member States. The requirements governing which fire protection class is specified for which location therefore differ from country to country. Installers and specialist planners must check and comply with the relevant local regulations.

In many countries there were still no mandatory requirements governing the use of fire classes in buildings at 1st July 2017. Where there are still no minimum mandatory legal requirements, there are generally recommendations by the CPR professional associations for application in the relevant countries.

Cables without “CPR classification” may still be installed and used providing there are no national requirements relating to the use of classified cables under Construction Products Regulation. If there already are national requirements relating to application, the use of such cables should be clarified with the authorities responsible.

Cables covered by the CPR but placed on the European market before 1st July 2017 and bearing the CE mark in accordance with the Low Voltage Directive (LVD) may continue to be sold on for an indefinite period.

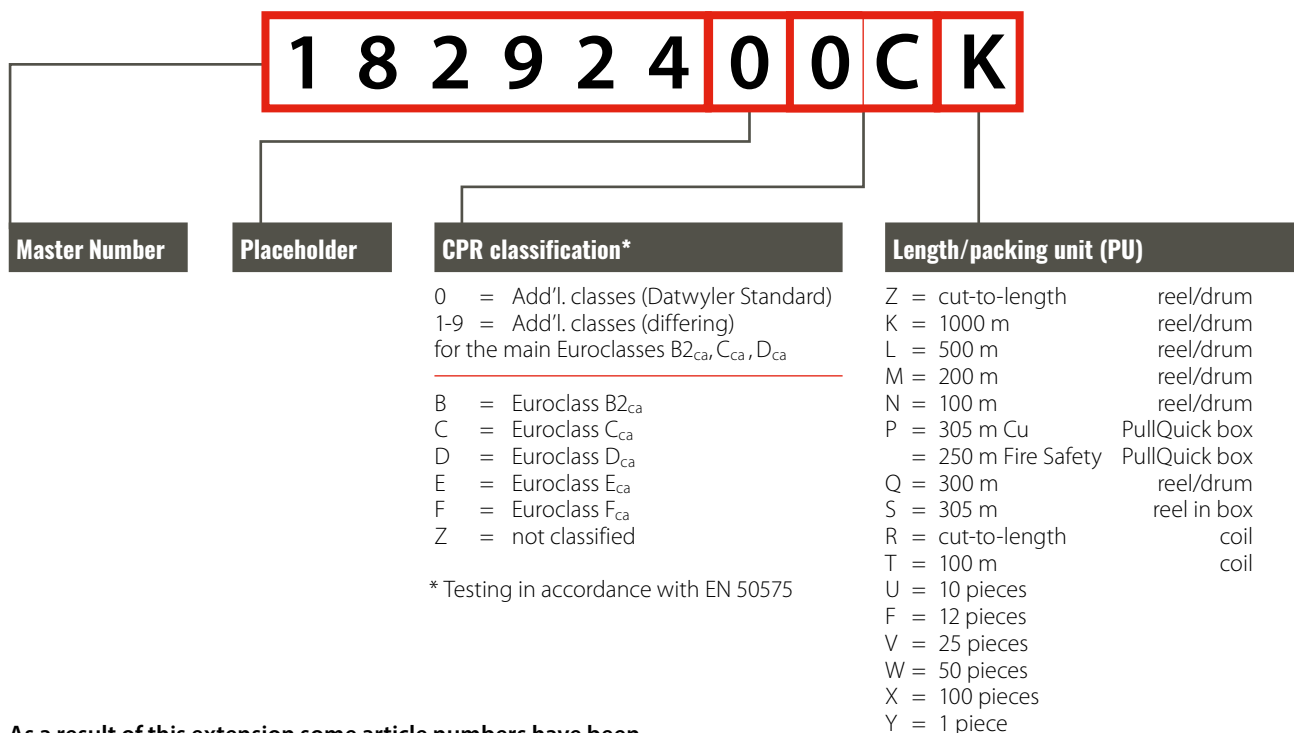

EXTENDED ARTICLE NUMBERS

In 2017, Datwyler began to gradually extend the article numbers of its cables and other products from 6 to 10 digits. This extension provides our customers with important additional information. The first 6 digits show the “master number” of the articles.

The 9th letter indicates the main Euroclass (“reaction to fire” according to the CPR, European Construction Products Regulation No. 305/2011). The 8th digit stands for the additional classes. The 10th letter shows the packaging (cable length or packing unit).

The key to the 10-digit article number:

As a result of this extension some article numbers have been integrated into the new ones and some totally replaced.

Note:

Our cables are not available in any CPR classification and any length or packing unit (PU) mentioned above. Please refer to our website for the different versions on offer. Here you can also find the Declarations of Performances (DoP) as PDF files for download.

STATEMENT FROM DATWYLER

As an environmentally conscious manufacturer and supplier of cabling solutions it is our concern not to use any environmentally harmful substances in our products.

Based on current information, the hereinmentioned regulations and directives for substances are fully complied with wherever applicable.

SMART MODULAR DATA CENTRE

Cutting edge solutions for small and decentralised data centres

Our world is becoming increasingly digital, interlinked and intelligent. IoT, automation, 5G, robotics and artificial intelligence are opening up many new applications and business models.

To capitalise the opportunities which come with digitalisation, your organisation must rely on a smart and strategic IT infrastructure.

The amount of data produced will continue to grow exponentially. These data volumes have to be processed close to their source (Edge Computing) due to, among other factors, efficiency and latency times. A lot of micro and mini data centres are needed to do this.

Datwyler is a global player that helps organizations to stay at the forefront of progress, elevating their core business. While you focus on developing your business, we take care of your data centre infrastructure – with a comprehensive of customised product solutions and one-stop service solutions tailored to your needs.

DATWYLER MICRO DATA CENTRE

Datwyler's modular Micro Data Centre is a compact, preassembled, plug-and-play, quick to deploy, fully monitored and managed, low maintenance onsite IT infrastructure solution. It is a standalone data centre that integrates the elements of cooling, power supply, monitoring and security into a single solution.

Unlike maintaining onsite data centres and server rooms which need extensive maintenance, planning, cost and space, the Datwyler Micro Data Centre is a compact solution that enables businesses to run applications on-premise or at the "Edge". The infrastructure can be customised according to customer needs and requirements.

(product may differ from illustration)

Specifications	MDC 100	MDC 200	MDC 300
Height units	43 U	43 U	43 U
Available space	42 U	39 U	33 U
Dimensions (HxWxD)	2134 x 798 x 809 mm	2134 x 798 x 1209 mm	2134 x 798 x 1209 mm
Doors	Closed (glas front and metal back)	Perforated	Closed (glas front and metal back)
Access control	EK333	EK333	EK333
UPS Capacity	-	up to 3 kVA	up to 3 kVA
Back-up time	-	13 / 28 min @ 100% / 50% load	13 / 28 min @ 100% / 50% load
Cooling capacity	-	-	3.6 kW
User interface	Touch screen, web browser	Web browser	Touch screen, web browser
Monitoring	Temperature, humidity, door status	Temperature, humidity, door status	Temperature, humidity, smoke, door status, leakage, vibration
Alarm	Sound/light alarm, email notification	Sound/light alarm, email/SMS notification	Sound/light alarm, email/SMS notification
Options	Cabling and cable management	Cabling and cable management, scalable backup batteries	Cabling and cable management, ventilation fans, fire extinction system, scalable backup batteries

Versions

The Datwyler Micro Data Centre is a tailor-made and customised solution to fulfil the customers' specific needs and requirements

SMART MODULAR DATA CENTRE

DATWYLER MINI DATA CENTRE

Datwyler's modular Mini Data Centre is a state-of-the-art, pre-assembled plug-and-play IT infrastructure solution. It consists of a 43U rack with integrated power distribution, uninterruptible power supply (UPS), fire suppression system (optional), air gap sealing and environment monitoring system, as well as additional IT equipment racks and an in-row cooling system. It can be deployed within a few hours. It provides multiple ways to configure power and cooling redundancy to meet the current demand while being ready for future technology migration at low cost and with less disruption.

Datwyler's modular Mini Data Centre is designed for applications such as edge computing, small data centre, building distributor (BD), floor distributor (FD) and "smart facilities" deploying IoT devices and running AI, AR, VR and automation.

Specifications

IT load	up to 72 kW
UPS capacity	up to 80 kVA
IT racks	up to 8 (static load 1300 kg / rack)
Backup time	up to 15 min
Sensible cooling capacity	up to 75.3 kW (CW or DX)
Dimensions (W x D x H)	800 x 1200 x 2200 mm
Mounting	Direct on floor or on raised floor
Cable entry	Top / bottom access
Emergency ventilation	Top of the rack and front door

Remote management	Cooling system, UPS, access control, iPDU, environment setpoint and alarm notification
Remote monitoring	Cooling system, UPS, access control, iPDU, environmental monitoring system
User interface	Remote web interface
Alarm	Sound/light alarm, email notification

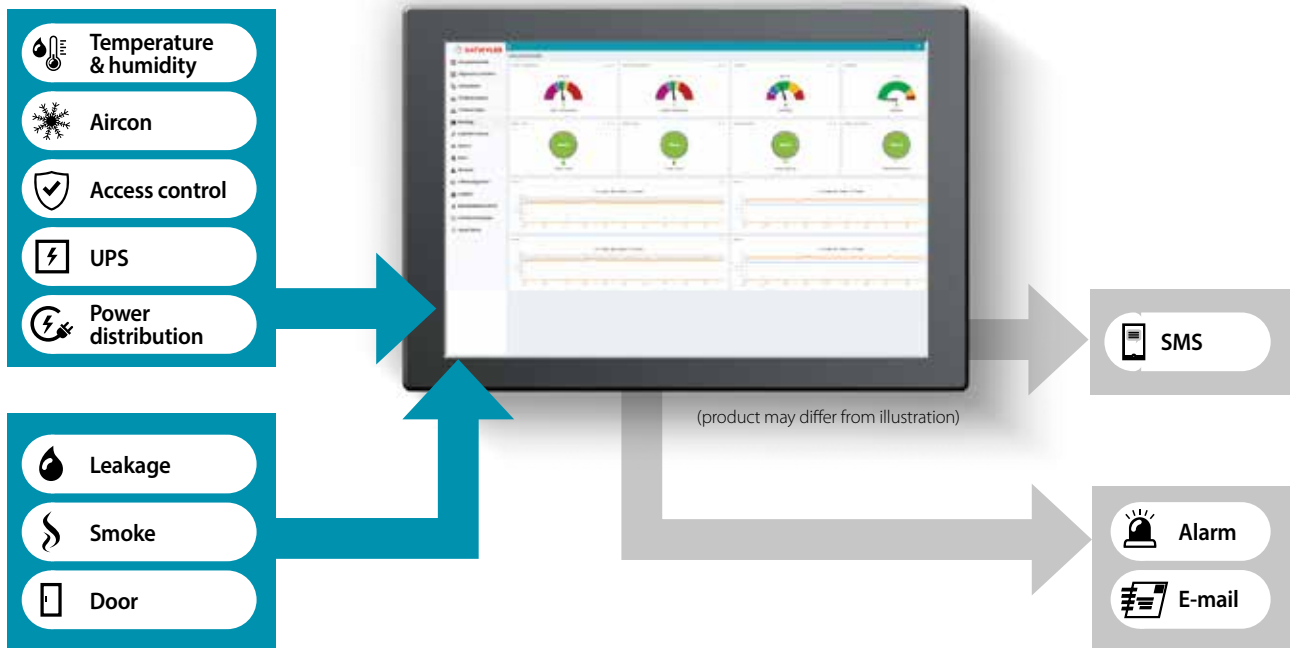

Versions

The Datwyler Mini Data Centre is a tailor-made and customised solution to fulfil the customers' specific needs and requirements

DIMS - DATWYLER INFRASTRUCTURE MONITORING SYSTEM

The Datwyler Infrastructure Monitoring System (DIMS) provides a top level as well as a detailed overview of the status of IT infrastructure housed within a Micro and Mini Data Centre. The system is characterized by real time remote monitoring of environmental conditions, access and energy consumption of IT infrastructure devices and systems. In case of faults or emergencies the system is capable of alerting the user to take timely and necessary action to protect the mission critical IT systems.

System architecture

DIMS features

- . Multilingual Web GUI with integrated logic
- . Autosensing ports for the automatic detection of sensors
- . User access management
- . Integrated interfaces: Ethernet, USB, CAN, analog & digital
- . SNMP-compatible
- . Provides notifications and alerts such as e-mail, SMS and SNMP traps
- . Extensive range of sensors for environmental monitoring, security control and power monitoring
- . USB interface for video camera
- . SD card slot for optional SD card (max. 64 GB)
- . SIM card slot for optional LTE modem
- . Alarms for maintenance and critical events
- . Graphical representation of environmental data

SMART MODULAR DATA CENTRE

RACK MONITORING SYSTEM

DIMS 300	Article no.	Description	PU
	41847300ZY	<p>DIMS 300 is a tried and tested monitoring system which can be used in all branches of industry for the continuous measurement, recording and reporting of performance-critical environmental factors in a rack. It combines the most advanced hardware and software.</p> <p>Robust metal housing in 19 inch format. Internal 230 volt power supply. 8 auto-sensing RJ12 ports for attaching sensors. Can be extended with additional sensor ports or digital inputs via CAN port. Alarm messages possible via bistable relays. Can be integrated into SNMP-compatible management software on request.</p> <p>Further features:</p> <ul style="list-style-type: none"> - 1x CAN port for extensions or CAN sensors - 12x bistable relay ports (dry contact) - 2x 12V DC / 0.25A relays - 2x bistable relays with status LEDs, max. 250V AC / 10A - 1x 12V DC connection for backup battery - 1x 2.0 HS mini USB slot for USB video camera or USB memory stick - 1x internal temperature sensor for controlling excessive temperature - 100 MBit Ethernet port - External earthing point - LEDs: power, relays, alarm, CAN - Front restart button - Network protocols: DHCP, HTTP, HTTPS, SSL, SNMP, SNMP Get, SMTP, SSL, FTP, Syslog, Radius, TLS - Functions: timer, ping, trigger, alarm filter, virtual sensors via SNMP Get - Types of alarm: FTP, Syslog, SMTP, SNMP Trap - Multilingual Web interface 	1 pc.

DIMS 200	Article no.	Description	PU
	41847200ZY	<p>DIMS 200 is a tried and tested monitoring system which can be used in all branches of industry for the continuous measurement, recording and reporting of performance-critical environmental factors in a rack. It combines the most advanced hardware and software.</p> <p>Robust metal housing. 12 volt plug-in power supply. 4 auto-sensing RJ12 ports for attaching sensors. Can be extended with additional sensor ports or digital inputs via CAN port. Alarm messages possible via bistable relays. Can be integrated into SNMP-compatible management software on request.</p> <p>Further features:</p> <ul style="list-style-type: none"> - 1x CAN port for extensions or CAN sensors - 4x bistable relay ports (dry contact) - 2x 12V DC / 0.25A relays - 1x 2.0 HS mini USB slot for optional USB video camera or USB memory stick - 1x internal temperature sensor for controlling excessive temperature - 100 MBit Ethernet port - External earthing point - LEDs: power, relays, alarm, CAN - Front restart button - Network protocols: DHCP, HTTP, HTTPS, SSL, SNMP, SNMP Get, SMTP, SSL, FTP, Syslog, Radius, TLS 	1 pc.

SENSORS (SELECTION)

DIMS sensors	Article No.	Type	Description	PU
	41847900ZY	DIMS door sensor	<p>Sensor for door monitoring in critical environments and racks. The connection is made via a free sensor port and is automatically recognized by the system.</p> <p>Connection: at sensor port Cascadable: yes Auto-sense: yes Extendable: up to 150 m Area of application: in-house Operating temp.: -10 to + 80 °C at 5% to 95% RH (relative air humidity)</p> <p>Scope of delivery: 1x sensor, 1x connection cable (2 m), 2x 4.8 x 16 mm screw for fastening, 2x double-sided tape</p>	1 pc.
	41847700ZY	DIMS temperature sensor	<p>Sensor for temperature monitoring in critical environments and racks. The connection is made via a free sensor port and is automatically recognized by the system.</p> <p>Connection: at sensor port Cascadable: no Auto-sense: yes Extendable: up to 100 m Measurement accuracy: ± 0.5 °C Operating temp.: -45 to + 105 °C at 5% to 95% RH</p> <p>Scope of delivery: 1x sensor, 1x 4-wire RJ11 cable (2 m), 1x 4.8 x 16 mm screw for fastening, 1x double-sided tape</p>	1 pc.
	41847800ZY	DIMS air humidity sensor	<p>Sensor for air humidity monitoring in critical environments and racks. The connection is made via a free sensor port and is automatically recognized by the system.</p> <p>Connection: at sensor port Cascadable: no Auto-sense: yes Extendable: up to 50 m Measurement accuracy: ± 5% Measuring range: 10-95% RH Area of application: in-house Operating temp.: -10 to + 80 °C at 5% to 95% RH</p> <p>Scope of delivery: 1x sensor, 1x 4-wire RJ11 cable (2 m), 1x 4.8 x 16 mm screw for fastening, 1x double-sided tape</p>	1 pc.
	41848500ZY	DIMS smoke detector	<p>Smoke detector/fire alarm for indoor installation to monitor critical environments and racks. All detectors can be connected in series. A network of up to 10 detectors can be set up.</p> <p>Connection: at sensor port Cascadable: yes (up to 10) Auto-sense: yes Extendable: up to 150 m (smoke detector chain) Area of application: in-house Ambient temp.: 0 to + 70 °C at 5% to 95% RH Dimensions: Ø 100 mm x 45 mm Status indication: LED (red)</p> <p>Scope of delivery: 1x smoke detector, 1x RJ11 connection cable, 1x mounting material</p>	1 pc.
	41848600ZY	DIMS vibration sensor	<p>Sensor for vibration monitoring in critical environments and racks. The connection is made via a free sensor port and is automatically recognized by the system.</p> <p>Connection: at sensor port Cascadable: yes Auto-sense: yes Extendable: up to 145 m (entire sensor chain) Area of application: in-house Operating temp.: -10 to + 80 °C at 5% to 95% RH</p> <p>Scope of delivery: 1x sensor, 1x RJ11 connection cable (2 m), 1x mounting material</p>	1 pc.
	41848000ZY	DIMS leakage sensor	<p>Sensor for leakage monitoring in critical environments and racks. The connection is made via a free sensor port and is automatically recognized by the system.</p> <p>Connection: at sensor port Cascadable: no Auto-sense: yes Extendable: up to 100 m Area of application: in-house Response time: 1 sec Reset time: 1 sec Operating temp.: -10 to + 80 °C at 5% to 95% RH</p> <p>Scope of delivery: 1x sensor, 1x connection cable (2 m), 1x mounting material</p>	1 pc.

SMART MODULAR DATA CENTRE

DATA CENTRE ONLINE CONFIGURATION

Smart Modular Data Centre configurator

The configurator for our Smart Modular Data Centres (SMDC) offers you the opportunity to easily plan and design the desired IT infrastructure solution – from small (Micro) to medium-sized (Mini) to large data centres.

It includes racks, UPS, intelligent power distribution, air conditioning, cabling, leak detection, fire alarm, fire suppression, access control and environmental monitoring – with SMS and email notification.

After entering the project requirements, the tool generates workshop drawings with technical specifications, data sheets and target prices. In addition, users are able to design Smart Modular Data Centres that comply with international standard Tier classification levels.

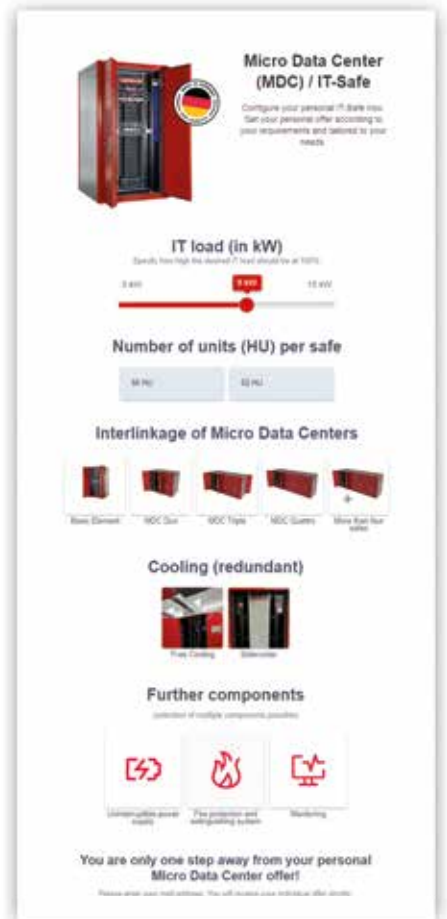

Configure your Smart Modular Data Centre based on your individual needs.

In addition, there are two other configurators for Europe:

IT Safe configurator / Micro Data Centre

Protect your sensitive data and servers on site with an IT Safe / Micro Data Centre against all major physical hazards such as theft, vandalism and natural forces.

Configure your IT Safe / Micro Data Centre based on your individual needs.

Data Centre Container configurator

Use the mobile Data Centre Container wherever critical applications, data and servers are used in your business. In addition to mobile and modular use, the Data Centre Container protects against dust, damage, fire, rain, extinguishing water and unauthorised access.

Configure your Data Centre Container based on your individual needs.

As a reliable partner, Datwyler provides advice on all aspects of secure IT infrastructure solutions. In addition, Datwyler supplies, installs, operates and maintains them in the usual high quality.

WE WILL BE HAPPY TO ADVISE YOU PERSONALLY.

Just send us an email and we will get back to you immediately:

support.itinfra.eu@datwyler.com

SMART MODULAR DATA CENTRE

DATA CENTRE HEALTH CHECK

Datwyler Data Centre Health Check assessment service provides an entry-level on-site assessment of existing data centre IT infrastructures and components.

The Data Centre Health Check compares your current environment to the industrial standards and best practices for maintaining a reliable facility. We identify high priority issues, overall system risks and problem areas while providing recommendations for data centre improvements. Datwyler performs the assessment by its own certified data centre experts.

WHY DATA CENTRE HEALTH CHECK?

- . Check compliancy related to defined standard
- . Indicate single points of failure
- . Identify weaknesses, prevent downtime and increase availability
- . Analyse internal organization processes and documentation
- . Provide recommendations for improvement

MEASUREMENTS

- . Thermal scanning
- . Temperature and humidity measurement
- . Power consumption measurement
- . Airflow measurement
- . Cabling infrastructure performance tests
- . Electrostatic potential and grounding tests

HEALTH CHECK PROCEDURES

1. Pre-visit:

Meeting with your IT and data centre operational team at the site along with completion of a questionnaire: define availability class, requested specifications and size in order to provide a detailed assessment offer.

2. Document study:

Collect and analyse your relevant documents.

3. Site assessment:

Assessment based on a pre-defined catalogue of criteria; measurements on cooling systems, power supply systems, cabling infrastructure, safety and security environment as well as staff interviews.

4. Information analysis:

Conduct a gap analysis by comparing the results from the catalogue of criteria and site assessment with data centre international standards to evaluate the current state of your data centre facility.

5. Report:

Present the results to you in a clear format that quickly addresses the issues and summarizes the risks along with recommendations to optimize performance and to improve efficiency.

DESIGN VALIDATION

We validate the design of your new or existing data centre and compare it for compliance to EN 50600 standard.

The outcome is a report which will indicate the level of compliance.

ASSESSMENT

- . We perform an assessment based on the relevant European standard EN 50600.
- . We use a comprehensive test catalogue covering the building environment, building construction, power supply systems, fire alarm and fire suppression systems, security systems, air conditioning, cabling, organisation and documentation.
- . We conduct a gap analysis to evaluate compliance of your data centre facility.

SERVICES

Effective expert services for all our customers

Companies can optimise their resources and concentrate on their core competences by outsourcing IT tasks to specialist providers, while at the same time ensuring that their IT systems are always state-of-the-art and safe from cyber attacks.

Our services cover the whole value chain: from site surveys, conception and system engineering through installation, logistics and turnkey supply to documentation and system maintenance. The basis for this is our competence in product design, operating experience, international presence, and our globally established partner network.

Datwyler believes that individual and flexible solutions are part of a good service. First-class support and fast response times in the event of problems are a matter of course for Datwyler.

DATA CENTRE INFRASTRUCTURE AND DATA NETWORK SERVICES

The Datwyler Data Centre Infrastructure and Data Network range of services includes all the technical and site-related measures needed to ensure the successful design and project implementation of your IT infrastructures as well as their professional maintenance.

- Design and Consultancy
- Audit and Assessment
- Financing and Leasing
- Turnkey Implementation and Commissioning
- Maintenance and Repair

Further information can be found on our website under the menu item "Services".

SERVICE LEVELS FOR DATA CENTRE INFRASTRUCTURE SOLUTIONS

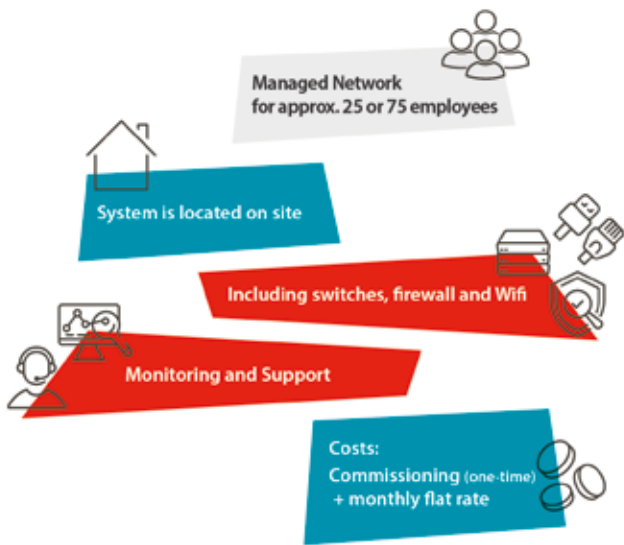

Datwyler's IT infrastructure solutions meet the highest quality standards. Still, the wear of mechanical and electronic components, the aging of batteries or the pollution of filters can lead to unwanted failures. Your systems require regular maintenance to ensure proper operation and maximum availability throughout the entire operating cycle.

Scope of services:	Data Centre SLA Basic	Data Centre SLA Premium
Yearly maintenance		
Review and functional control of all components according to the configuration	x	x
Execution of maintenance work during office hours, Mon – Fri, 08:00 a.m. – 05:00 p.m.	x	x
Execution of maintenance work outside office hours, Mon – Fri, 05:00 p.m. – 10:00 p.m.	optional	optional
Further maintenance windows, at weekends, at nights, etc.	on request	on request
Status report and entry in the maintenance log	x	x
Support and response time		
Free support hotline 5 x 8 hrs (office hours, Mon – Fri, 08:00 a.m. – 05:00 p.m.)	x	x
Ticketing account in customer portal 7 x 24 hrs	x	x
Free augmented reality support		x
Guaranteed response time until the next working day (Mon – Fri, 08:00 a.m. – 05:00 p.m.)	x	x
Guaranteed response time 24 hrs / 365 days a year	optional	optional
Extended warranty service		
Guaranteed availability of spare parts and components during the contract period for a maximum of 10 years	x	x
Free spare parts and wear parts*		x
Repair costs		
Repair assignments depending on the effort*	x	
Free on-site repairs		x
Monitoring		
Remote monitoring of all components according to the configuration		x

* if not covered by guarantee or warranty

Access to these services is restricted to data centres and data networks installed by Datwyler. Datwyler will submit maintenance alternatives on request which will be tailored to your particular requirements.

MANAGED SERVICES

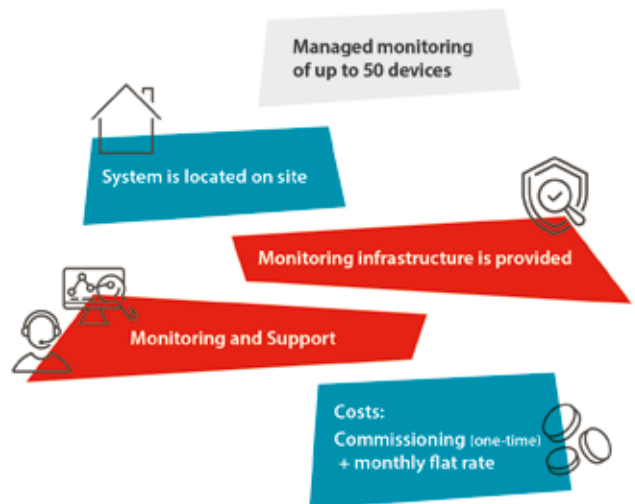

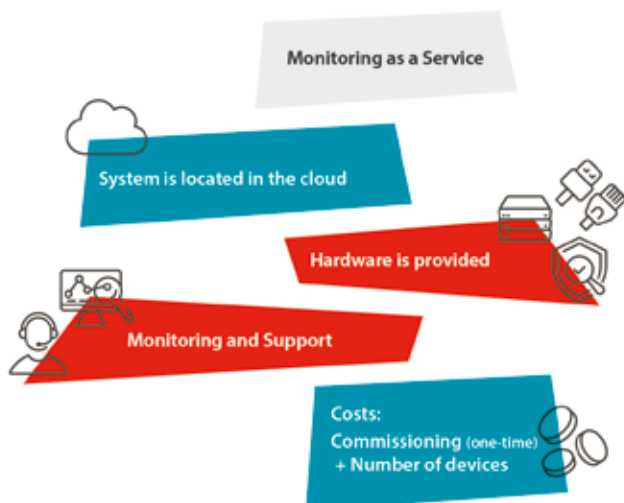

Datwyler IT Infra has established a reputation as a provider of reliable IT infrastructure solutions. By adding managed networks and managed monitoring to the portfolio Datwyler supports organisations in being able to concentrate on their core competences.

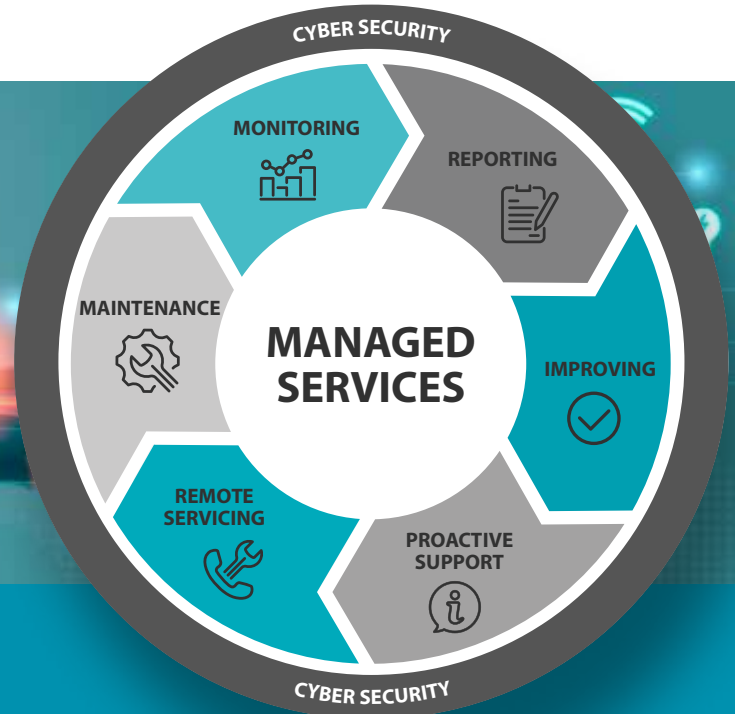

Datwyler offers standardised **Managed Network** packages adapted to customers with up to 25 or up to 75 employees. As well as this there are individualised solutions tailor-made to the customer's requirements. Datwyler attaches great importance to high performance and the greatest possible security.

These services are perfectly coordinated. They include planning, implementation and administration of the network, and they ensure that everything runs smoothly. This also includes monitoring the entire network in order to identify and rectify potential problems and attacks at an early stage. A central element of the managed networks are the integrated security solutions that protect against cyber attacks.

Datwyler's **Managed Monitoring** and **Monitoring-as-a-Service** allow companies to monitor their IT infrastructure around the clock. Data from the network, servers, applications and end devices are continuously collected and analysed, and potential problems are identified before they can cause malfunctions.

The Datwyler team of experts also supplies its customers with detailed reports which help them optimise the performance of their IT infrastructure.

SERVICE LEVELS FOR MANAGED SERVICES

Scope of services:	Service Basic	Service Premium	Service Premium+
Maintenance of the network infrastructure			
Maintenance work at fixed agreed times/year	6x	12x	12x
Maintenance work during office hours, Mon – Fri, 08:00 a.m. – 05:00 p.m.	x	x	x
Maintenance work outside office hours Mon – Fri, 05:00 p.m. – 10:00 p.m.		x	x
Maintenance work at weekends (Sat/Sun)			x
Detailed maintenance report	x	x	x
Support and response time			
Support Hotline 5 x 9 hrs (office hours, Mon – Fri, 08:00 a.m. – 05:00 p.m.)	x	x	x
Customer Portal Ticketing System 7 x 24 hrs	x	x	x
Guaranteed response until the next business day (NBD)*	x		
Guaranteed response within 4 hrs*		x	
Guaranteed response within 1 h*			x
Extended warranty service			
Guaranteed availability of spare parts and components*	x	x	2 h
Repair and maintenance costs			
Free support (incl. free on-site support)			x
Monitoring			
Monitoring of the components agreed in the service and proactive response within the agreed response time	x	x	x
Prices			
Fixed commissioning costs	x	x	x
Monthly flat rate	x	x	x

* Office opening hours 08:00 a.m. – 05:00 p.m.

COPPER SOLUTIONS

High-grade copper system solutions

Datwyler develops, manufactures and distributes high-grade and futureproof network infrastructure solutions based on copper cabling technology - from analogue telephony to 10- and 40-gigabit Ethernet. These system solutions set standards for quality, reliability and performance and meet all media convergence needs.

With Datwyler copper cabling systems you can always keep up with the constantly increasing transfer rates and exploit the full potential of networks. Thus, they offer high investment security for the future.

The comprehensive product range extends from single cables and components to complete end-to-end systems. The modular solutions of Datwyler are suitable for all sizes and types of Local Area Networks (LANs), comms rooms and data centres.

COPPER CABLING SYSTEM

The Datwyler product portfolio includes shielded and unshielded copper technology system solutions for the transmission of analog and digital voice, image, multimedia and data signals as well as control signals and remote power (PoE to 4PPoE).

On the following pages you will find our recommendations for copper data networks with transmission speeds of 1 Gbit/s, 10 Gbit/s and more – i.e. for all your applications in office environments and data centres. Here you can also basically choose between especially future-proof “high-end” and “premium” solutions as well as cables and components which are very popular with our customers due to their cost-effectiveness or optimum price-performance ratio.

The demands on cabling systems continue to grow at a rapid pace. A shielded 10 Gbit/s copper solution from Datwyler brings such high performance to your office environment that it also equips your network infrastructure for future technologies (from page 26 onwards). These days it is vital to plan well ahead in a data centre environment as well, in order to be prepared for further technological advances (from page 75 onwards).

SHIELDED VS. UNSHIELDED

The higher the demands on data infrastructure, the greater the influence from the surrounding systems. As part of the ISO standard, new specifications have been established for coupling damping and Alien Cross Talk. These parameters demand an error-free 1GBase-T and 10GBase-T application.

An independent analysis within a third party laboratory has highlighted the problem from outside influence. A simple mobile phone within the area of a 1GBase-T application can create interference on a 1GBase-T unshielded application.

Datwyler therefore recommends shielded Channel solutions for guaranteed performance on a secure network.

DATWYLER CABLES

- + DATWYLER COMPONENTS
- + QUALITY ENGINEERING
- = 25-YEAR SYSTEM WARRANTY

The sophisticated Datwyler training and certification programme for Solution Partners guarantees the optimal installation quality of our products. Certified partners can offer a Datwyler warranty for the installed systems: normally for 25 years, but this can be extended depending on project criteria.

DATWYLER LINK RECOMMENDATIONS

High-End Link: greatest headroom, PoE++/4PPoE, future-proof

Highest bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

Premium Link: good headroom, PoE++/4PPoE, future-proof

High bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

Most Economical Link

The solution which is most commonly used by Datwyler customers for the transmission of voice, video, multimedia and data signals.

CU 7702

4P / 2x4P, Cat.7_A, AWG22

CU 7080

4P / 2x4P, Cat.7, AWG23

CU 6552

4P / 2x4P, Cat.6_A, AWG23

The colours indicate which cables and components are correlated.

Please find the product data sheets and link performance certificates on the Datwyler website. Besides the article numbers you will also find the respective Declarations of Performances (DoPs according to CPR) as PDF files for downloading.

This overview provides recommended cables and components which are the best fit to your current and future requirements. **Please note the recommended links on the following pages which are highlighted in different colours.**

COPPER SOLUTIONS - 25/40 Gbit/s STP

DATA CABLE - CATEGORY 8

Copper data cables, up to 2000 MHz, 4 x 2 x AWG23, for data centre and structured premises cabling.
 Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010.
 Application up to 40GBase-T, reserves for future applications.
 Developed for 40GBase-T and a transmission distance of 30 m.
 Optimized for broadband video signals, e.g. analogue and digital TV signals.
 PoE+ and PoE++/4PPoE-ready (max. 100 W).
 Particularly suitable for Class I and Class II networks.

S/FTP

DATA CABLE - 25 GBIT/S

Copper data cable, up to 2000 MHz, 4 x 2 x AWG22, for data centre and structured premises cabling.
 Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010.
 Application up to 25GBase-T, reserves for future applications.
 Developed for 25GBase-T and a transmission distance of 50 m.
 Optimized for broadband video signals, e.g. analogue and digital TV signals.
 PoE+ and PoE++/4PPoE-ready (max. 100 W).

GG45™ Connecting System

Measurement / Patch cord GG45 7_A, 1000 MHz, 4P, shielded Adapter patch cord PS-GG45 / RJ45, 4P, shielded

The measurement cords PS-GG45 7_A, 1000 MHz, 4P, are primarily needed for acceptance measurements.
The PS-GG45 plugs are not backward compatible with RJ45 jacks.
The combination of a high-performance PS-GG45 cabling system with RJ45 active devices can only be achieved with adapter patch cords (PS-GG45 to RJ45).

Measurement / patch cord

COPPER SOLUTIONS

Pre-assembled trunk cables

COPPER TRUNKS

Length determination & design of pre-assembled copper trunks

Dimensions

Flexible cable 12-fold
CU 7702 12x4P flex

Solid cable 6-fold
CU 7002 6x4P

Flexible cable 6-fold
CU 7702 6x4P flex

Length definition

The following criteria are decisive for all pre-assembled Datwyler copper trunks:

- L** = Length between dividers / fixing points (= purchase order length)
- A** = Type of assembly side A:
as required / depending on application, legs graded in length or of equal length
- B** = Type of assembly side B:
as required / depending on application, legs graded in length or of equal length

Connectors & cable types

Pre-assembled trunk cables are fabricated using high-performance cable products which are supplied in combination with different performance levels of modules and connectors.

The products are delivered in the lengths requested by the customer and have already been tested and certified in accordance with the latest standards.

This provides installers and operators, particularly in data centers, with products which make it possible to install even extensive copper-based systems to the highest quality in a very short time.

Tailor-made pre-terminated copper trunk assemblies, in the requested lengths, with customized imprints on the single cables, with the requested modules or plugs, 100% pre-tested, with measurement reports!

Modules and plugs for trunks

type	application	construction	compatible with cable
Category 6_A modules / Class E_A			
RJ45 module KS-TC Plus 1/8 Cat. 6 _A (IEC)	up to 10GBase-T	shielded	flex / solid

CONSOLIDATION POINT BOXES

CP box for one 24-port front plate

W x H x D: 480 x 55 x 190 mm (with lock: H = 57 mm)

CP box for one 12-port front plate

W x H x D: 260 x 55 x 190 mm (with lock: H = 57 mm)

CP box for one 6-port front plate

W x H x D: 156 x 55 x 190 mm (with lock: H = 57 mm)

Application

For the termination of data cables in a Consolidation Point (CP), typically installed in raised floors.

Suitable for the following Datwyler Keystone modules:

- PS-GG45 7 4P shielded
- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-TC Plus 1/8 Cat. 6_A shielded
- RJ45 module MS-K Plus 1/8 Cat. 6_A shielded
- RJ45 module MS-C6_A 1/8 Cat. 6_A 180°-K shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded
- RJ45 module KU-TC 1/8 Cat. 6 / Cat. 5e unshielded

Article No.	Description	Material	PU

417483	Consolidation Point box, 12-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417484	Front plate FP 12x MGK for CP box 12-port	steel sheet, galvanized	1 pc.
417487	Consolidation Point box 6-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417488	Front plate FP 6x MGK for CP box 6-port	steel sheet, galvanized	1 pc.
417485	Lock for Consolidation Point box, keyed alike	steel sheet, galvanized	1 pc.

FLOOR BOX INSERTS

Floor box inserts Economy

for Keystone modules MS-K, GG45, KS-T, KU-T

Description

Floor box inserts Economy for Keystone modules. Modules can be clipped into the cut-outs directly (without additional adapter plates). Cut-out (port) dimensions: 14.8 x 19.3 mm.

Suitable for the following Datwyler Keystone modules:

- PS-GG45 7 4P shielded
- RJ45 module KS-T Plus 1/8 Cat. 6_A shielded
- RJ45 module KS-TC Plus 1/8 Cat. 6_A shielded
- RJ45 module MS-K Plus 1/8 Cat. 6_A shielded
- RJ45 module MS-C6_A 1/8 Cat. 6_A 180°-K shielded
- RJ45 module KS-T 1/8 Cat. 6/E_A shielded
- RJ45 module KS-TS 1/8 Cat. 6/E_A shielded
- RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded
- RJ45 module KU-TC 1/8 Cat. 6 / Cat. 5e unshielded

RJ45 Feed-through coupler

Application

Suitable for setting up Consolidation Points and Cross-Connect wirings. For the transmission of all digital and analogue applications up to Cat.6_A/Class E_A. Angled or straight.

MS-KS, 90° angled:
MS port (left side),
Keystone port (right side)

MS-KS, 180° straight:
MS port (left side),
Keystone port (right side)

Keystone, 180° straight:
Keystone ports on both sides

Field assembly plugs

IP20, Cat.6_A, angled or straight, for tool-less field assembly

RJ45 plug IP20, Cat.6_A,
shielded

RJ45 plug IP20, Cat.6_A,

ACCESSORIES

Defined Disconnect CP-Link

Adapter cable, IP20

Application

Releases the connection of patch cable and socket above a certain tensile force and thus protects circuit boards and sockets from damage.

Particularly compact adapter cable.

Meets the Channel performance requirements of ISO 11801 and EN 50173 Class E_A despite its extremely small dimensions.

Defined Disconnect CP-Link

In medical technology, sound studio technology and measuring technology as well as in the connection of computer systems. Reliably separates any connection above a defined tensile force to protect the equipment. The restraining force is set in such a way that unintentional triggering is prevented. Pull out force 20 N +15/-10 N.

FIBRE OPTIC SOLUTIONS

Conclusive fibre optic systems

Datwyler, as an experienced and innovative cable manufacturer, supplies complete fibre optic cabling solutions - including services and support in the areas of consultation, planning, engineering, design, development, training, installation and documentation, if requested.

Datwyler has a comprehensive offering of fibre optic cables and components for high-density, high-speed data network solutions.

Our solutions are designed, overall and in detail, to fully meet the demands of the future. They are adapted to meet customer's needs and ensure a network infrastructure that will support future applications for a long time to come.

PREMISES NETWORKS

Horizontal (Desk)	Riser	Data Centre	Backbone (Campus)
The horizontal serves the desk or application workspace	The riser joins together equipment in a floor-level telecommunications closet and upper floor closets or zones.	The data centre is a facility dedicated to data-intensive applications, where racks of interconnected equipment manage large amounts of information.	The backbone is typically the longest run in a premises network, often interbuilding.

Application spaces

From a communications pathway perspective, premises networks consist of four primary sections:

Backbone (Campus)	OS2
Data Centre	OS2, OM4, OM5
Riser	OS2, OM3, OM4
Horizontal (Desk)	OM3, OM4

The premises network outlined on the right side, or portions thereof, may also be called a local area network (LAN) or enterprise network.

Top 5 design considerations

- Link length
- Application
- Future performance
- Power budget
- Environmental requirements

Two major fibre classifications

The two major classifications of optical fibre are single-mode and multimode.

SINGLE-MODE FIBRE

Single-mode fibres are best suited for longer distance applications (>1 km). Single-mode fibre is designed to carry only one mode of light, and thus does not experience modal dispersion like multimode fibre.

Single-mode E9/125

Optical single-mode fibre cable transmission performance parameters

Classification	Optical fibre type and cable type	Wavelength [nm]	Modenfeld-Durchmesser [nm]	Cladding diameter [nm]	Coating diameter [nm]	Typical attenuation wired [db/km]	Maximum attenuation wired [db/km]
ITU-T G.652.D BLO	Singlemode E9/125 OS2	1310	9.2 +/- 0.4	125 +/- 0.7	242 +/- 5	0.34	0.4
		1550	10.4 +/- 0.5			0.21	0.3
		1625				0.23	0.3
ITU-T G.652.D / ITU-T G.657.A1	Singlemode E9/125 OS2	1310	9.2 +/- 0.4	125 +/- 0.7	242 +/- 5	0.34	0.4
		1550	10.4 +/- 0.5			0.21	0.3
		1625				0.23	0.3
ITU-T G.657.A2	Singlemode E9/125 OS2	1310	8.6 +/- 0.4	125 +/- 0.7	242 +/- 5	0.36	0.4
		1550	9.6 +/- 0.5			0.22	0.3
		1625				0.25	0.32

The fibre designation (OS2) corresponds to the designation of ISO/IEC 11801 or EN 50173. OS2 is commonly referred to as "low water peak" single-mode fibre and is characterized by having a low attenuation coefficient in the vicinity of 1383 nm.

MULTIMODE FIBRE

Multimode fibres are suitable for premises applications where the links are a few hundred meters long and there are many connectors. The larger core diameter of multimode fibre allows the use of affordable 850 nm transmitter diodes as well as low-cost connectors. Multimode fibre uses a graded index profile to minimize modal dispersion. This design maximizes bandwidth while maintaining large cores for simplified system assembly and lower network costs. For multimode fibres, bandwidth is the major limiting factor in network design.

Multimode G50/125

Optical multimode fibre cable transmission performance parameters

Classification	Optical fibre type and cable type	Speed	Wavelength [nm]	Attenuation typical (cabled) [db/km]	Attenuation maximum (cabled) [db/km]	OFL bandwidth as per TIA/EIA 455-204 and IEC 60793-1-41 [MHz x km]	High-Performance EMB bandwidth as per TIA/EIA 455-220A and IEC 60793-1-49 [MHz x km]
ISO/IEC 11801/EN 50173 TIA 492AAAC OM3 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 1300	2.5 0.5	2.7 0.7	1500 500	≥ 2000 n/a
ISO/IEC 11801/EN 50173 TIA 492AAD OM4 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 1300	2.5 0.5	2.7 0.7	3500 500	≥ 4700 n/a
ISO/IEC 11801/EN 50173 TIA 492AAAE OM5 bend optimized 850 nm laser-optimised	Multimode 50/125 µm	≥ 10 Gb/s	850 953 1300	2.5 1.8 0.6	2.7 1.8 1.0	3500 1850 500	≥ 4700 ≥ 2470 n/a

The fibre designation (OM3 up to OM5) corresponds to the designation of ISO/IEC 11801 or EN 50173. Laser-optimised fibres are defined by their Effective Modal Bandwidth (minEMB, 850 nm VCSEL laser).

Multimode fibre link lengths and data rates

Although fibre bandwidth is a critical factor in determining link length and data rate, it is not the only one. Transmitter and receiver characteristics are as important as fibre bandwidth in determining supportable link lengths at specified data rates. At high data rates (40/100 Gbit/s) also the attenuation of the connectors limit the link length.

Bend optimized multimode fibres (G50/125)

With higher bit-rate transmissions (≥ 10 Gbit/s) the attenuation budgets are constantly decreasing. Thus, one has to focus on high-grade products when selecting the fibre optic components. The optical fibres should provide an enhanced transmission reliability and reduce the risks of additional losses that may arise as a result of typical faulty use and of mechanical stress. This is the reason why Datwyler use the bend optimized G50/125 fibre for OM3 up to OM5 fibre categories: In case that the minimum bending radius is undercut, this leads not necessarily to failure of a connection. However, too small bending radii should be avoided to extend the lifetime of fibre optic cables (and optical fibres). The bend optimized G50/125 fibres are fully compatible with "traditional" G50/125 fibres as described in the standard.

Outdoor cable with steel armor (rodent protection) on request.

FO patch panel OV-E, 19"/1U, loaded

Splice box with shelf for excess tube lengths below the drawer

For the termination of fibre optic cables - maximum of 48 fibres.
Loaded with FO adapters, ready for splicing, with prepared pigtails (per 2 m, colour code: IEC 60304).
Telescopic, folding drawer with stop.
Shelf for excess tube lengths below the drawer.
Cable mounting plate at the rear.
Splice cassettes are hinged, can be easily folded up.

Splice box OV-E, 19"/1U, extractable configuration example with 12 LC Duplex adapters APC and 24 pigtails

Variants on request.

FO patch panel OV-S, 19"/1U, loaded

Breakout box with adapters

Made of powder-coated sheet steel.

For the termination of pre-assembled fibre optic cables - maximum of 96 fibres.

Extractable drawer.

Numbered front panel, labeling strips as accessories (not for versions with LCQ adapters).

Loaded with a maximum of 24 FO adapters.

Breakout box OV-S, 19"/1U, extractable,
configuration example with 6 SCD adapters

19"/1U breakout box, E9/125 OS2

FIBRE OPTIC SOLUTIONS

Connector termination

Connector termination: optical performance values

Datwyler offers a broad range of terminated connectors for individual customer needs. These can be supplied in Simplex as well as in Duplex variants. Most types are available as APC/HRL variants, too. We are also able to deliver terminations for higher optical performance requirements.

Ferrule material: zirconia
 MPO: polymer
 Lifetime: 1000 connections with stable attenuation values
 Test conditions IL: IEC 61300-3-4
 Test conditions RL: IEC 61300-3-6
 Reproducibility of the IL value: during the whole lifetime a maximum of +/- 0.1 dB
 Operating temperature: -10° C up to +60° C

Connector	IL [dB] typical	IL [dB] maximum	RL [dB] typical	RL [dB] minimum	Grade (IEC 61755)
MM	0.15	0.3	35	30	better than Bm2m
SM	0.12	0.25	55	50	better than B2
SM/APC	0.12	0.25	70	65	better than B1
MTP®/MPO MM	0.15	0.3	25	20	better than Bm2m
MTP®/MPO SM	0.1	0.25	65	60	better than C1

All connectors are tested with our Simplex, Duplex and Mini Zipcord cables as well as our pigtailed.

Please note

Our single fibre cables and the connectors of our Duplex patch cables are marked with cable clips "A" and "B".

There is a single Duplex clip enclosed to enable a change of polarity.

Wiring of a FO Duplex patch cable A to B

MTP® is a registered brand name of US Conec.

Please visit our website for more information and products

FLEXIBLE TRUNKS

Length determination & design of pre-assembled FO trunks

Description

A Datwyler FO flexible trunk consists of up to 24 single fibre cables (per 2.0 mm) that are combined in a sturdy HDPE braided hose and have pre-assembled connectors on both ends. FO flexible trunks come in customized lengths and gradations. This solution is suitable especially for data centre cabling, rack-to-rack connections and multiple patch links. Delivery with optical attenuation measurement report.

Length definition

The following criteria are decisive for all pre-assembled Datwyler FO trunks:

- L** = Length between dividers / fixing points (= purchase order length)
- A** = Type of assembly side A: as required / depending on application, legs graded in length or of equal length
- B** = Type of assembly side B: as required / depending on application, legs graded in length or of equal length

FIBRE OPTIC SOLUTIONS

Pre-assembled trunk cables

FIBRE-OPTIC TRUNKS

Pre-assembly of loose-tube cables with all current FO connector types

Trunk termination

Up to 48 fibres, with all current FO connectors. After the divider (screwable) each single fibre is protected by aramide yarn and has its own sheath. Single fibre termination graded in length (max. 2 m after divider). Comes in crush-resistant hose (IP67), optional with braided sleeving only. Delivery with optical attenuation measurement report (with OTDR: optional at an extra charge).

Trunk termination (article numbers are valid for both sides)

LCD-U on request (up to 96 fibres)

Pre-assembly of breakout cables with all current FO connector types

Breakout assembly

Termination of up to 24 single-fibre cables, with all current FO connectors. Single fibre termination optionally graded in length. Delivery with optical attenuation measurement report. Comes in braided sleeving (optional at an extra charge: with cable gland and/or crush-resistant hose protection).

Breakout assembly	Connector type	Number of connectors	Multimode fibre Article No.	Single-mode fibre Article No.
on one cable end	SC	4	1410596	415023
on one cable end	SC	8	1410597	415024
on one cable end	SC	12	1410598	415025
on one cable end	SC	24	415083	415081
on one cable end	LC	4	415085	415090
on one cable end	LC	8	415086	415091
on one cable end	LC	12	415087	415092
on one cable end	LC	24	415088	415093

Attention: please order the breakout cable separately - according to your individual needs. When ordering a trunk cable please ensure that the specified length of the trunk cable is defined by the length of the longest single-fibre cable. This means: the total length of the trunk cable is the length of the cable between the two splits plus the additional length of the longest single-fibre cable on both sides.

WE DO IT. FOR YOU.

Your successful digitalization starts with Datwyler's pioneering IT infrastructure:

- Fibre networks / FTTx
- Intelligent buildings
- Data centres

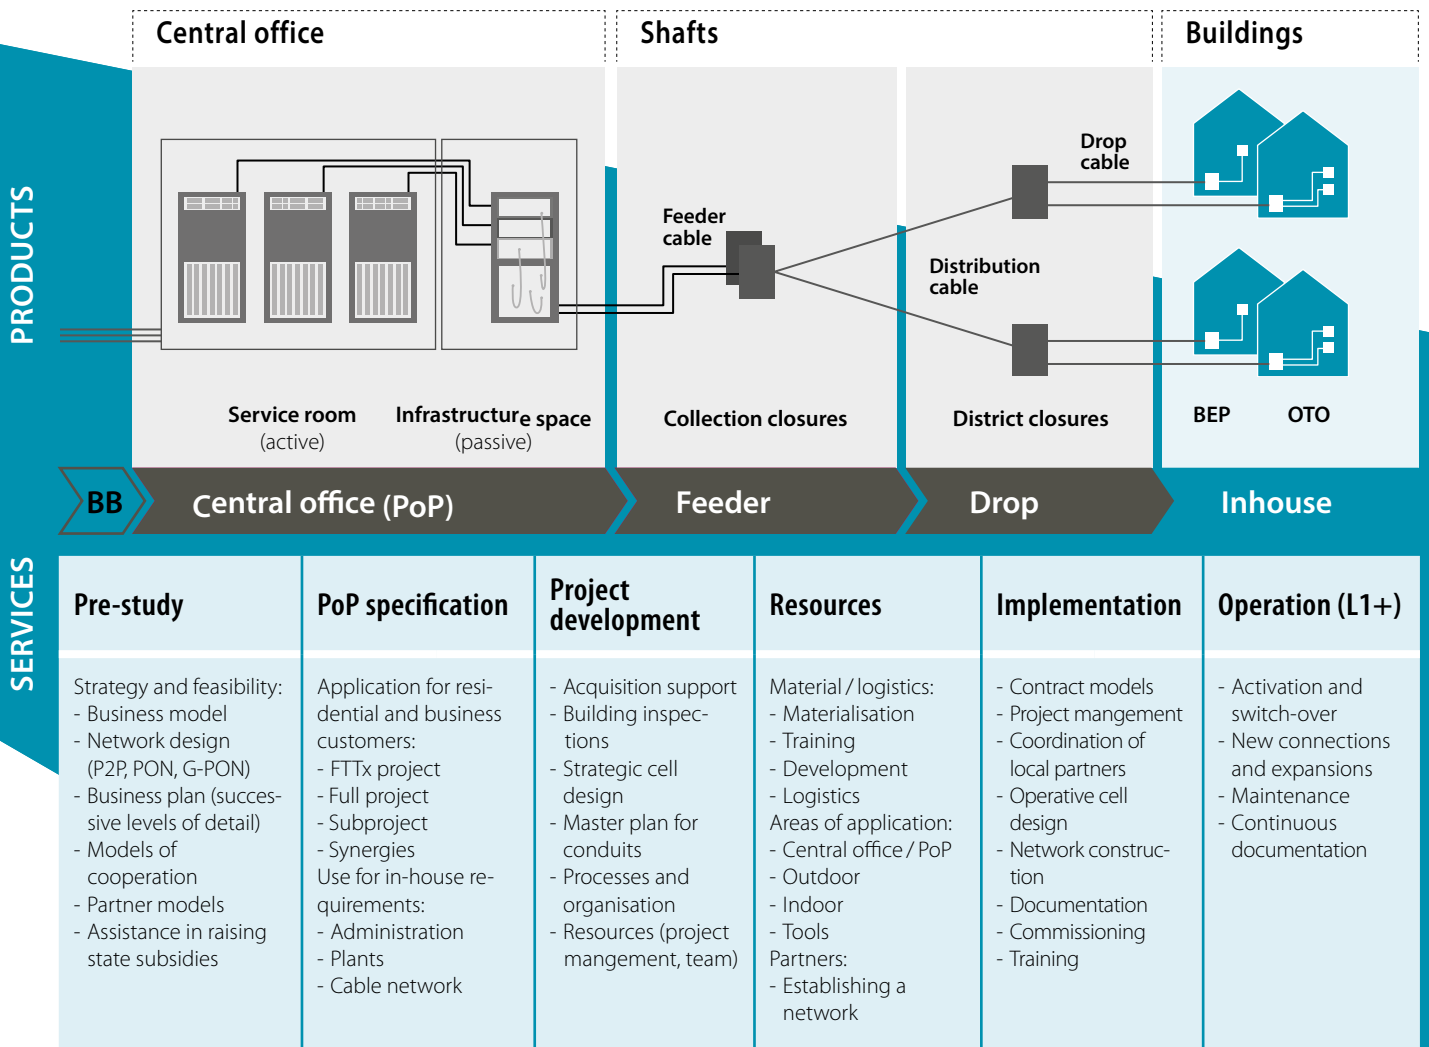

With our innovative systems, products and services we enable you to scale your business with ease.

TURNKEY SOLUTIONS FROM A SINGLE SOURCE

As an expert turnkey partner we can, if you wish, hand over your complete ready-to-use IT infrastructure: on time, with the services previously arranged, in the version you want and at the cost agreed.

In collaboration with experienced local partners we are also happy to support you in business and engineering planning at the preliminary stage of your project as well as turnkey execution in the passive network sector right through to acceptance, documentation and maintenance of the systems and installations implemented.

DATWYLER'S FUTURE-PROOF DATA CENTRE CABLING SOLUTIONS — A COMPARISON

HIGH-DENSITY DATA CENTRE SOLUTION (HD-DCS)

DATA CENTRE SOLUTION (DCS)

The HD-DCS offers users higher quality features than the DCS and, in addition, more than twice the port density and even greater flexibility. The HD-DCS housings feature integrated cable management, which simplifies installation and maintenance. Port labelling is also simpler and more flexible.

Performance features:

- Extremely compact solution with maximum port density (MTP and LCD)
- Flexible assembly with plug-in modules of different size/port density (6, 12, 24)
- Integrated cable management and labelling system
- Compact patch cables (2 mm) with push-pull tabs
- Patch and breakout cables with CPR classification (up to B2_{ca})

Product details from page 77

DCS is a future-proof, preassembled plug-and-go fibre optic solution characterised by high-quality cables and components and high-precision connector assembly. Due to its outstanding optical and geometric values, it is suitable for all current and future high-speed applications in the data centre. Modular components can be combined as required, thus providing users with a maximum in design flexibility.

Performance features:

- Simple installation with intuitive labelling and easy access from the front
- High quality 3U/7HP plug-in modules
- Connectivity solutions with MTP, LDC and LCQ
- Breakout and splice solutions available
- Simple integration of copper connections

HIGH-DENSITY DATA CENTRE SOLUTION

Datwyler's modular high-density cabling solution is characterised by its port density and flexibility

The implementation of IoT, AI and Big Data is expected to lead to a general, steady increase in the traffic of digital data. Large amounts of data are generated every second and have to be processed and transferred to their destination. As a result, data centers and data networks are growing rapidly.

In order to cope with this growth, companies need connection technology for their active components with very high port densities and flexibility for future requirements.

A Datwyler HD-DCS modular solution offers this network flexibility, a great scalability in the smallest space, saves rack space and enables intelligent connection configurations. HD-DCS is the ideal solution for fibre optic data networks, especially in data centres. HD-DCS modules are particularly suitable for all high-density and high-performance applications with duplex signals. With these modules, a packing density of up to 1152 fibres per 1U can be achieved (MTP₁₂).

With a Datwyler HD-DCS solution, your data network infrastructure is ready for future growth.

HIGH-DENSITY DATA CENTRE SOLUTION

Patch panels and cassettes

PATCH PANEL

HD-DCS modular panel, 19"/1U

to take 4 or 12 HD-DCS plug-in modules

Modular, scalable high-density platform for the data centre environment. Sturdy stainless steel housing with depth-adjustable cable support plate and front 19"/1U mounting brackets. Pre-assembled with four slots to take HD-DCS plug-in modules from the front or rear. Each slot accepts three modules with 6 ports or one module with 12 or 24 ports.

Allows for variable, scalable port densities from 48 up to 96 ports (LCD and MPO/MTP®). Up to 192 fibres (with LCD) or 1152 fibres (with MTP₁₂), per height unit.

Article No.	Description	Colour (front plate)	Colour	PU
473600	HD-DCS panel, 19" 1U, 4x 12/24-port	black	silver	1 pc.
473601	HD-DCS panel, 19" 1U, 12x 6-port	black	silver	1 pc.
473602	HD-DCS panel, 19" 1U, 6/12/24-port	black	silver	1 pc.

CASSETTES

HD-DCS MTP module, 1x MTP on 6x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP trunk cables. Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment. Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL). Polycarbonate (PC) housing with press-fit cover (sealed). Insertion into the panel from the front. The MTP coupler at the rear is routed to the front couplers (6LCD) by way of an internal fanout. Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 144 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473520	HD-DCS MTP module, 1x MTP on 6x LCD/PC, OM4	black	1 pc.
473522	HD-DCS MTP module, 1x MTP on 6x LCD/PC, OS2	black	1 pc.
473523	HD-DCS MTP module, 1x MTP on 6x LCD/APC, OS2	black	1 pc.

HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP® trunk cables. Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment. Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL). Polycarbonate (PC) housing with press-fit cover (sealed). Insertion into panel from the front or rear. The MTP Duplex coupler at the rear is routed to the front couplers (2x 6LCD) by way of internal fanouts. Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 96 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473500	HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC, OM4	black	1 pc.
473504	HD-DCS MTP module, 1x MTP Duplex on 12x LCD/PC, OS2	black	1 pc.
473506	HD-DCS MTP module, 1x MTP Duplex on 12x LCD/APC, OS2	black	1 pc.

HD-DCS MTP module, 2x MTP Duplex on 24x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP trunk cables.
 Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
 Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front or rear.
 Two MTP Duplex couplers at the rear are routed to the front couplers (4x 6LCD) by way of internal fanouts.
 Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 192 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473501	HD-DCS MTP module, 2x MTP Duplex on 24x LCD/PC, OM4	black	1 pc.
473505	HD-DCS MTP module, 2x MTP Duplex on 24x LCD/PC, OS2	black	1 pc.
473507	HD-DCS MTP module, 2x MTP Duplex on 24x LCD/APC, OS2	black	1 pc.

HD-DCS BO module, 6x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled LC/LCD trunk cables.
 Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front.
 Rear side slot fitted with a cable grommet.
 Front couplers with integrated, automatic transparent dust shutters.

A packing density of 144 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473560	HD-DCS BO module, 6x LCD/PC, OM4	black	1 pc.
473562	HD-DCS BO module, 6x LCD/PC, OS2	black	1 pc.
473563	HD-DCS BO module, 6x LCD/APC, OS2	black	1 pc.

HD-DCS BO module, 12x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled LC/LCD trunk cables.
 Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front or rear.
 Rear side slot fitted with a cable grommet.
 Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 96 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473540	HD-DCS BO module, 12x LCD/PC, OM4	black	1 pc.
473544	HD-DCS BO module, 12x LCD/PC, OS2	black	1 pc.
473546	HD-DCS BO module, 12x LCD/APC, OS2	black	1 pc.

HIGH-DENSITY DATA CENTRE SOLUTION

Cassettes

HD-DCS BO module, 24x LCD/PC or LCD/APC OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled LC/LCD trunk cables.
 Suitable for all high-density and high-performance applications with duplex signals, particularly in the data centre environment.
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front or rear.
 Rear side slot fitted with a cable grommet.
 Front couplers with integrated, automatic transparent dust shutters.

A packing density of up to 192 fibres on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473541	HD-DCS BO module, 24x LCD/PC, OM4	black	1 pc.
473545	HD-DCS BO module, 24x LCD/PC, OS2	black	1 pc.
473547	HD-DCS BO module, 24x LCD/APC, OS2	black	1 pc.

HD-DCS BO module, 6x MPO OM4 or OS2, for HD-DCS modular panel

Accepts pre-assembled MTP® trunk cables.
 Suitable for all high-density and high-performance applications with parallel optic signals, particularly in the data centre environment.
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front.
 Rear side entry fitted with a rubber grommet.
 Front couplers with translucent dust plugs.

A packing density of 864 fibres (MTP₁₂) on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473590	HD-DCS BO module, 6x MPO, OM4	black	1 pc.
473592	HD-DCS BO module, 6x MPO, OS2	black	1 pc.

HD-DCS BO module, 12x MPO for HD-DCS modular panels, for OM4, OS2

Accepts pre-assembled MTP® trunk cables.
 Suitable for all high-density and high-performance applications with parallel optic signals, particularly in the data centre environment.
 Polycarbonate (PC) housing with press-fit cover (sealed).
 Insertion into panel from the front and back.
 Two rear side entries fitted with rubber grommets.
 Front couplers with translucent dust plugs.

A packing density of 576 fibres (MTP₁₂) on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473570	HD-DCS BO module, 12x MPO, OM4	black	1 pc.
473574	HD-DCS BO module, 12x MPO, OS2	black	1 pc.

HIGH-DENSITY DATA CENTRE SOLUTION

Cassettes and accessories

HD-DCS BO module, 24x MPO for HD-DCS modular panels, for OM4, OS2

Accepts pre-assembled MTP® trunk cables.
Suitable for all high-density and high-performance applications with parallel optic signals, particularly in the data centre environment.
Polycarbonate (PC) housing with press-fit cover (sealed).
Insertion into panel from the front and back.
Two rear side entries fitted with rubber grommets.
Front couplers with translucent dust plugs.

A packing density of 1,152 fibres (MTP₁₂) on 1U can be achieved with this module type.

Article No.	Description	Colour	PU
473571	HD-DCS BO module, 24x MPO, OM4	black	1 pc.
473575	HD-DCS BO module, 24x MPO, OS2	black	1 pc.

ACCESSORIES

HD-DCS patch cable management set, 0U 4 management elements, detachable label plate

The patch cable management 0U comes in a set of 4 pieces.
Patch cables can be routed easily within the same rack unit of the modular panel.
No additional rack unit needed for patch cable routing.
An appropriate label plate including label cover is part of the set.
The label plate can be fold down during the patching process for additional space.

HD-DCS patch cable management set 0U includes the following preassembled parts:

- 4 cable guides
- 4 label plates
- 4 label plate covers
- 4 paper labels (preprinted)

Application example

Article No.	Description	Colour	PU
473620	HD-DCS patch cable management set, 0U	black	1 pc.

HIGH-DENSITY DATA CENTRE SOLUTION

Accessories

HD-DCS blind plates for HD-DCS modular panel

Unused slots of the HD-DCS panel can be covered by blind plates depending on panel version. Blind plates for 6-port and 12/24-port module available.

Article No.	Description	Colour	PU
473023	HD-DCS blind plate, 1x6-port	black	1 pc.
473029	HD-DCS blind plate, 12/24-port	black	1 pc.

HD-DCS cable fixation base for HD-DCS modular panel

For mounting installation cables on the cable tray of the HD-DCS panel. Velcro tape provides the necessary hold. The Velcro base is attached without tools by a 45° turn.

Article No.	Description	PU
473043	HD-DCS cable fixation base, 8-35 mm	10 Stk.
473042	HD-DCS cable fixation base, 4-20 mm	10 Stk.

HD-DCS snap-on fixation clip for HD-DCS modular panel

Fixation clip for the storage of the installation cables. Excessive cable lengths can thus be optimally guided and deposited. Easy mounting by sliding it into the HD-DCS cable tray.

Article No.	Description	Colour	PU
473040	HD-DCS snap-on fixation clip, 8 mm	black	1 pc.
473041	HD-DCS snap-on fixation clip, 14 mm	black	1 pc.

DATWYLER DATA CENTRE SOLUTION

The future-proof solution for your data centre cabling

High-performance system solutions in copper, but chiefly in fibre optic technology constitute the backbone of high-speed data transfer in data centres. The ever higher transmission rates not only call for high-quality optical fibres, they also make increasing demands on the connecting components. Both system components are crucial to the efficient performance of transmission channels.

Flexibility is a core requirement for a cabling solution in today's data centre environment. New systems need to be planned, assembled and installed within a very short time. New technologies (like BiDi), new generations of devices (like 25G servers) and new network designs (fabrics) mean that the demands on link performance are continually rising.

Datwyler's Data Centre Solution (DCS) surpasses all the requirements for modern, powerful cabling solutions, its high quality and excellent optical and geometric connector assembly values being of particular note here.

FO-DCS - DATWYLER DATA CENTRE SOLUTION

FUTURE-PROOF CABLING SOLUTION

for data centres

Benefits of the Datwyler Data Centre Solution:

- Top quality guarantees top performance
- High packing densities hand in hand with good clear layout
- Fast and easy assembly (plug-and-go)
- Modifications/installations possible during ongoing operation, no need for outside companies (reduced OPEX)
- Preassembly: no in-situ stripping, splicing or connector termination work necessary
- Slimline cable design, so no disruption to cooling air flow and no redundant lengths of cable in rack
- Scalable thanks to modular design
- Investment protection and future viability as migratable to future applications
- High spare capacity due to extremely low optical losses
- Power budget protection thanks to bend-optimised fibres (multimode)

The most important system components:

- Preassembled fibre optic mini trunks
- Preassembled fibre optic plug-in modules (MTP, Breakout or Splice version)
- Fibre optic fanout cables (100G on 4x 25G, for example)
- Fibre optic patch cables (LCD and MTP)
- Modularly equipped 19-inch 1U panels and 3U/4U subracks
- Patch management trays and cable management accessories

These system components provide high-performance modular solutions for server room and data centre cabling tailored to customer requirements, the outstanding features of which are clear layout, flexibility, high packing density and good handling during operation.

Optical values of the Datwyler Data Centre Solution:

Criterion	Assembly Class	Insertion Loss IL [dB]		Return Loss RL [dB]	
Connector type	IEC 61755-3-2	mean	maximum	mean	minimum
MTP Elite® 0° PC (multimode)	Grade B	0.15	0.3	≥ 40	≥ 35
MTP Elite 8° APC (single-mode)	Grade B	0.1	0.3	≥ 70	≥ 65
LCD Uniboot 0° PC (multimode)	Grade B	0.1	0.25	≥ 40	≥ 35
LCD Uniboot 8° APC (single-mode)	Grade B	0.1	0.25	≥ 75	≥ 65

FIBRE OPTIC CHANNEL CONFIGURATION OPTIONS

The high-performance carefully coordinated cables and components of the Datwyler Data Centre Solution can be combined as required and make it possible to implement an open infrastructure design decoupled from the user's equipment pool. The system also allows simple migration to future applications. The graphics below show some typical configurations. Please see our website for more.

Module-to-module configuration

Two FO-DCS plug-in modules are interconnected by a thin mini breakout cable MTP-MTP. For all known Duplex applications up to 25G Ethernet or up to 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCQ	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

MTP® and MTP Elite® are registered brand names of US Conec.

FO-DCS - DATWYLER DATA CENTRE SOLUTION

Module-to-module configuration (without MTP)

Two FO-DCS splice plug-in modules are interconnected by a thin FO Universal cable with LCD connectors.
For all known Duplex applications up to 25G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	FO Universal cable U-DQ(ZN)BH (e.g. with LCD)	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Breakout plug-in module, 3U/7HP, 6x LCO	Capacity: 24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Module-to-fanout configuration

One FO-DCS plug-in module is connected to two FO-DCS fanout cables (MTP® on LCD Uniboot) by a thin FO-DCS mini breakout cable MTP-MTP for a direct link between the active ports (e.g. ports of a SAN switch). For all well-known Duplex applications such as 10G and 25G Ethernet or 16G and 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B
4	High-performance	Front plate, 3U/7HP, 2x MTP adapter, type A	also available with 4x or 8x MTP adapter
5	High-performance	Fanout cable, 1x MTP on 6x LCD Uniboot	Polarity: type A or type C

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

Converter plug-in module configuration

Two FO-DCS converter plug-in modules are interconnected by a FO-DCS mini breakout cable MTP-MTP.
For three 40G, NG100G, PSM4, PLR4 or 64GFC links.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Converter plug-in module, 3U/7HP, 24F, 2x MTP on 3x MTP	24 fibres (2x 12 on 3x 8 fibres)
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres

These system components are available in multimode (OM4) and single-mode (G.652.D) versions.

Migration to 40G/100G (parallel optics)

The FO-DCS plug-in modules in subracks are replaced by FO-DCS front plates with MTP adapters.
The high-performance FO-DCS mini-breakout cables MTP-MTP can continue to be used.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Front plate 3U/7HP 4x MTP adapter, type A	also available with 2x or 8x MTP adapter
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres
4	High-performance	Y patch cable (1x MTP 24F on 2x MTP 12F)	Polarity: type A, B or C, 24 fibres

MTP® is registered brand name of US Conec.

FO-DCS - DATWYLER DATA CENTRE SOLUTION

Subracks and patch panels

SUBRACKS & PATCH PANELS

FO-DCS modular subracks, 19"

Pre-assembled with horizontal guide rails - can be modularly fitted.
 Take a maximum of twelve 3U/7HP FO-DCS plug-in modules or front plates.
 Capacity: up to 144 Duplex ports (288 fibres) or up to 144 MTP® ports (1728 fibres).
 Any mixture of modules / front plates can be installed in the same subrack.
 Extractable excess cable length tray (1U) - can be inserted on the fourth rack unit in two ways, so that optionally the slots or holes can be used as cable entry openings.

440055	Plug-in module for 6x RJ45 module Keystone (without modules)	black	1 pc.

CLEANING TOOLS

The cleanliness of high-quality FO connectors is critical for satisfactory optical performance and long-term trouble-free transmission. Connectors that are dirty, worn or scratched due to improper use will have a negative effect on optical performance because the Insertion Loss (IL) increases whilst the Return Loss (RL) falls.

All FO-related cabling standards point out that professional cleaning tools are necessary to ensure successful acceptance tests and trouble-free patching.

For professional cleaning of FO connectors (e.g. MPO/MTP®) the equipment as featured in Datwyler's FO accessories portfolio is particularly suitable.

Article No.	Fig.	Description	Items cleaned / method	PU

DCS - DATWYLER DATA CENTRE SOLUTION

Patch and fanout cables

PATCH AND FANOUT CABLE

DCS fanout cables, MTP®-LCDU

**8 fibres, OM4, OM3 or OS2
for splitting 100G into 4x 25G or 40G into 4x 10G**

Thin, very flexible fibre-optic fanout cable (round cable, Ø 2.0 mm) with 8 fibres.
Low fire load due to its halogen-free flame-retardant LSOH sheath.
Available with 2.5 m standard length (other lengths on request).
Standard connectivity method can be type A or type C.
Sticker labelling at both cable ends.
Breakout separation is effected with a thin divider housing.
The legs (Ø 2.0 mm) with LCD Uniboot (LCDU) plugs are numbered (1-4).
The legs can be ordered graded in length or of equal length.
Project-specific assemblies are available on request.
Suitable for all high-performance applications in the data centre environment.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).

For splitting all known multimode and single-mode QSFP applications like SR4, PSM4, PLR4 and FCp in four Duplex channels; the connectivity separates a four-channel parallel optics link in four Duplex links.

Article No. type A	Article No. type C	Description	Fibre type	Cable sheath colour	PU

MTP® is a registered brand of US Conec.

DCS fanout cables, MTP®-LCDU

**12 fibres, OM4, OM3 or OS2
for connecting active components**

Thin, very flexible fibre-optic fanout cable (round cable, Ø 2.0 mm) with 12 fibres.
Low fire load due to its halogen-free flame-retardant LSOH sheath.
OM4 versions are available with 2.5 m standard length (other lengths on request).
Standard connectivity method can be type A or type C.
Sticker labelling at both cable ends.
Breakout separation is effected with a thin divider housing.
The legs (Ø 2.0 mm) with LCD Uniboot (LCDU) plugs are numbered (1-6).
The legs can be ordered graded in length or of equal length.
Project-specific assemblies are available on request.
Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).

The connection between six duplex ports and one parallel optic port enables quick and space-saving cabling of active components such as routers, switches, servers and storage systems.

DCS - DATWYLER DATA CENTRE SOLUTION

Patch and fanout cables

DCS patch cords, LCDU

OM4, OM3 and OS2

Round Uniboot patch cables with Intelli-Cross mechanism for fast polarity change. Compact cable design with FR/LSZH cable sheath (2.1 mm) and 2 fibres. Available in lengths up to 10 m (other lengths on request). Connectivity A to A or A to B. Sticker labelling at both cable ends. Suitable for all high-performance applications with duplex signals in the data centre environment. Preassembled with LCD Uniboot Intelli-Cross connectors (high-performance) at both ends. Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).

DCS patch cords, MTP®

OM4, OM3 or OS2

Thin, very flexible fibre-optic patch cable (round, Ø 2.0 mm) with 12 fibres. Low fire load due to halogen-free flame-retardant LSZH sheath. Available in lengths up to 5 m (other lengths on request). Standard polarisation modes: A, B or C. Sticker labelling at both cable ends. Suitable for all high-performance applications with parallel optic signals in the data centre environment. Pre-assembled with high-performance MTP connectors (female) at both ends. Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL). Comes with push-pull tabs.

Patch and fanout cables

DCS fanout cable, MTP®-LCDU

**12 fibres, OM4 or OS2
for connecting active components**

Thin, very flexible fibre-optic fanout cable (round cable, Ø 2.0 mm) with 12 fibres. Low fire load due to its halogen-free flame-retardant LSOH sheath. OM4 versions are available with 2.5 m standard length (other lengths on request). Standard connectivity method can be type A or type C. Sticker labelling at both cable ends. Breakout separation is effected with a thin divider housing. The legs (Ø 2.0 mm) with LCD Uniboot (LCDU) plugs are numbered (1-6). The legs can be ordered graded in length or of equal length. Project-specific assemblies are available on request. Assembled to a very high quality which guarantees optimum values for optical performance (IL/RL).

The connection between six duplex ports and one parallel optic port enables quick and space-saving cabling of active components such as routers, switches, servers and storage systems

IT RACKS AND ACCESSORIES

Solutions for every requirement

A well-chosen rack or cabinet will not only look good, but will add security, increase the lifespan of your devices and also make it easier to maintain the equipment inside, so saving you money and time.

The Datwyler IT racks are as varied as the requirements of our customers. The range includes Standard and Premium racks as well as wall-mounted racks of various sizes, dimensions and configurations. The racks can be adapted to the intended configuration, the relevant cooling concepts, the cabling and/or your safety requirements.

Our wide range of rack accessories includes fans, lighting, earthing and equipotential bonding sets, PDUs, cable management kits, shelves, faceplates and individual doors to coordinate with the cabinets, as well as a lot more besides.

SERVER RACKS

Server Racks Premium DSRP 19"/42U and 48U

with perforated doors

Server Rack Premium DSRP,
42U, 600 x 1200 mm

Application

The Datwyler Server Racks Premium DSRP are heavy-duty cabinets with fully welded frames especially designed for data centres, server rooms and comms rooms. Its load capacity of up to 1500 kg makes it possible to install even heavy equipment within a footprint of a standard rack.

Features

Size:	Height: 42U and 48U Width: 600 mm or 800mm Depth: 1000 or 1200 mm
Construction:	Welded sheet steel frame (2.0 mm, partially 1.5 mm)
Load capacity:	1500 kg, balanced on 19-inch vertical profiles
19 inch profiles:	2 pairs of 19-inch vertical profiles, 600 mm, front / rear, stepless depth adjustment from inside, with U label
IP rating:	IP20
Colour:	Black or light grey
Front / rear doors:	One-piece perforated doors, 86% perforation, with swivel handle lock, DIN profile, universal key 333, 3-point locking, up to 180° aperture angle; front door can be hinged right or left
Side panels:	Removable, locks with universal key
Top panels:	One-piece (D: 1000 mm) or multi-piece (D: 1200 mm), removable, 100 mm round cable entry hole with plastic cover in each corner, 2-4 additional 300 x 100 mm cable entry holes, covered with sheet steel plates
Bottom panels:	Multi-piece, removable, 100 mm round cable entry hole with plastic cover in each corner, 2-4 additional 300 x 100 mm cable entry holes, covered with sheet steel plates
Feet:	Set of 4 adjustable feet
Delivery:	Fully assembled and packed, including installation instructions Comes with pre-installed flat earthing kit and mounting kits (screws, cage nuts, washers)
Optional accessories:	2-door sets, plinths, castors, rack baying kits, etc. (see from page 104 or visit ITinfra.datwyler.com)

IT RACKS AND ACCESSORIES

Datwyler offer a wide range of racks and cabinets. Below is a selection from our product range. In order to find the ideal solution for your installation, please contact us. Our local sales office will be pleased to assist you.

NETWORK RACKS

Network Racks Standard Flex (disassembled) 19"/42U

with glass front door and steel rear door

Application

The Datwyler Network Racks Standard Flex are designed to provide good-quality cabinets that offer an unrivalled cost-performance ratio. Flex racks are used in areas with limited space in which racks with welded construction cannot be installed

Features

Sizes:	Height: 42U Width: 800 mm Depth: 1000 mm
Construction:	Whelded sheet steel frame (1.5 mm), connected by 32 M6x12 screws, delivery in disassembled state (for on-site assembly), bayable
Load capacity: 19-inch profiles:	800 kg 2 pairs of 19-inch vertical profiles, front / rear, adjustable from inside, with U label
IP rating:	IP40 (with side panels)
Colours:	Black or light grey
Front door:	With tinted safety glass, up to 180° aperture angle, with swivel handle lock, DIN profile, universal key, 1-point locking
Rear doors:	2 sheet steel doors with swivel handle lock, DIN profile, universal key 333, 3-point lock (or with removable rear panel, see list below)
Side panels:	Sheet steel, with locks
Top panel:	One-piece, with 100 x 300 mm cable entry hole, suitable for dust protection panel with brush (195060), opening for the installation of fan ventilation unit 420 x 440 mm
Bottom panel:	with one 100 x 300 mm cable entry hole, suitable for dust protection panel with brush (195060), two 100 x 115 mm opening, one 300 x 115 mm opening and opening for the installation of fan ventilation unit 420 x 440 mm
Feet:	4 adjustable feets
Delivery:	with earthing kit; comes without plinth

	195481	Slide rails, nominal depth: 500 mm, distance between the 19" levels: 496 mm, depth: 442 mm, maximum load: 50 kg, including mounting material	black, RAL 9005 1 pair
	195469	Slide rails, nominal depth: 600 mm, distance between the 19" levels: 596 mm, depth: 542 mm, maximum load: 50 kg, including mounting material	black, RAL 9005 1 pair
	19550100ZY	Slide rails, nominal depth: 800 mm, distance between the 19" levels: 796 mm, depth: 742 mm, maximum load: 50 kg, including mounting material	black, RAL 9005 1 pair
	195418	Keyboard holder, folding, 19", 1U, for maximum keyboard size of 480 x 175 mm, the keyboard can be fixed with self-adhesive velcro tapes (included)	black, RAL 9005 1 pc.
	195190	Keyboard holder, telescopic, 19", 1U, depth: 480 mm, for a maximum keyboard width of 400 mm and height of 36 mm, including mounting bracket	black, RAL 9005 1 pc.
	195191	19"/3U drawer, 1.25 / 1.5 mm powder coated sheet steel, 430 mm total depth, 280 mm pull distance, 10 kg maximum load, comes with universal lock and 2 keys	black, RAL 9005 1 set
	195181	Documents pocket, A4, self-adhesive	1 pc.
	195329	Vertical grounding bar 15U, 5 clamps	1 pc.
	195330	Vertical grounding bar 18U, 5 clamps	1 pc.
	195331	Vertical grounding bar 21U, 5 clamps	1 pc.
	195332	Vertical grounding bar 27U, 5 clamps	1 pc.
	195333	Vertical grounding bar 33U, 5 clamps	1 pc.
	195297	Vertical grounding bar 42U, 5 clamps	1 pc.
	195334	Vertical grounding bar 45U, 5 clamps	1 pc.
	195359	Vertical grounding bar 48U, 5 clamps	1 pc.
	19538600ZY	Clamp for grounding bar	1 pc.
195251	Grounding bar, 8 x 8 mm, 22 connection points, 40A, with mounting kit and grounding cable	1 pc.	

ACCESSORIES: VENTILATION & LIGHTNING

Fan ventilation	Article No.	Description	Colour	PU		
	195069	19" 2-fan ventilation unit, 224 m³/h, 38W / 0.18A, AC 230V/50Hz including thermostat, 0-60 °C, and 1.8 m cord, Schuko to C13 (w/o installation frame)	black, RAL 9005	1 pc.		
	195075		light grey, RAL 7035	1 pc.		
	195070	Installation frame for 19" 2-fan ventilation unit, top and bottom installation, w/o filter for racks of 600, 800 and 1200 mm depth	black, RAL 9005	1 pc.		
	195071	for racks of 1000 mm depth	black, RAL 9005	1 pc.		
	195076	for racks of 600, 800 and 1200 mm depth	light grey, RAL 7035	1 pc.		
	195077	for racks of 1000 mm depth	light grey, RAL 7035	1 pc.		
	195072	19" 4-fan ventilation unit, 448 m³/h, 76W / 0.36A, AC 230V/50Hz including thermostat, 0-60 °C, and 1.8 m cord, Schuko to C13 (w/o installation frame)	black, RAL 9005	1 pc.		
	195078		light grey, RAL 7035	1 pc.		
	195073	Installation frame for 19" 4-fan ventilation unit, top and bottom installation, w/o filter for racks of 600, 800 and 1200 mm depth	black, RAL 9005	1 pc.		
	195074	for racks of 1000 mm depth	black, RAL 9005	1 pc.		
	195079	for racks of 600, 800 and 1200 mm depth	light grey, RAL 7035	1 pc.		
	195080	for racks of 1000 mm depth	light grey, RAL 7035	1 pc.		
	195131	Compact fan ventilation units for roof mounting 2-fan ventilation unit, including thermostat, for rack depths 600 / 800 / 1200 mm	black, RAL 9005	1 set		
	195132	2-fan ventilation unit, without thermostat, for rack depths 600 / 800 / 1200 mm	black, RAL 9005	1 set		
	195133	2-fan ventilation unit, including thermostat, for racks depth 1000 mm	black, RAL 9005	1 set		
	195134	2-fan ventilation unit, without thermostat, for racks depth 1000 mm	black, RAL 9005	1 set		
	195135	4-fan ventilation unit, including thermostat, for rack depths 600 / 800 / 1200 mm	black, RAL 9005	1 set		
	195136	4-fan ventilation unit, without thermostat, for rack depths 600 / 800 / 1200 mm	black, RAL 9005	1 set		
	195137	4-fan ventilation unit, including thermostat, for rack depth 1000 mm	black, RAL 9005	1 set		
	195138	4-fan ventilation unit, without thermostat, for racks depth 1000 mm	black, RAL 9005	1 set		
Rack lighting	Article No.	Type	Dimensions	Voltage [V]	Colour	PU
	280504	LED, 19" 1U, 230V / 7.2W S DC 3m GR	448 x 54.5 x 26 mm	230 V AC	light grey, RAL 7035	1 pc.
	280505	LED, 19" 1U, 230V / 7.2W S DC 3m BK	448 x 54.5 x 26 mm	230 V AC	black, RAL 9005	1 pc.
	Designed for a variety of installation methods: tool-less, magnetic and/or with mounting frame					
	280510	Mounting frame	448 x 42 x 5 mm		light grey, RAL 7035	1 pc.
	280511	Mounting frame	448 x 42 x 5 mm		black, RAL 9005	1 pc.
	280506	LED, 350 mm, 230V / 11.5W S DC SK ALU	350 x 92 x 46 mm	230 V AC	aluminum	1 pc.
	280512	Connection cable 230V 3 m OR 3 x 1.52 mm	L = 3000 mm	230 V AC	orange	1 pc.
	280508	Door position contact 230V 1.5m AN BK, angled	95 x 63 x 24 mm	230 V AC	black, RAL 9005	1
	280509	Door position contact 230V 1.5m ST BK, straight	95 x 63 x 24 mm	230 V AC	black, RAL 9005	1

DIMS system description: see from page 13

WIRELESS SOLUTIONS FOR HIGH REQUIREMENTS

Mobility has become an integral part of modern day-to-day business. Employees, customers and partners take for granted the existence of wireless access points, and what's more, they are dependent on it. The massive increase of smartphones and tablet PCs in the workplace impressively proves this trend. Forward-looking companies have recognised the signs of the times and responded accordingly. Our future-proof high-density access point solutions are ideally suited for professional use in offices, factory buildings, conference halls, schools, hospitals and hotels.

Bandwidth-hungry applications such as IP television (IPTV), Video on Demand and Voice over WiFi in particular benefit from trouble-free operation with superlative "Quality of experience", even when being simultaneously used by a lot of people and over a large coverage area.

WiFi ARRAYS

Unlike conventional access points, the HD Access Points provide many already integrated devices: from 2 up to 4 radio cells, highly sensitive directional antennas, multi-gigabit switch, controller, firewall, spectrum analyser, and threat sensor.

The advantages of this all-in-one architecture are obvious: less arrays, less cables and less switch ports will result in less investment in communications infrastructure – already in the project implementation period.

Enhance your WiFi performance and network efficiency

Up to 13.88 Gbit/s bandwidth in the 802.11 a/b/g/n/ac (Wave 2) range ensure WiFi coverage of up to 780 users and an area of over 100 x 100 metres.

POWER SUPPLY

There are two ways of supplying power to the HD Access Points: you can use a PoE (Power over Ethernet) adapter or a multi-port PoE switch.

WiFi bandwidth for the future

The XD4 access point with its 4 radio cells and 4x4 Wave 2 (3.47 Gbps) 802.11 ac can be used for demanding indoor applications and as a reliable, robust outdoor solution - also as a part of the existing cabling infrastructure.

Powerful connection

HD Access Points can be connected with fibre optic cables or high-performance copper data cables.

MANAGEMENT

XMS-Cloud Management provides a platform for the centralized management of HD Access Points. Network administrators use it for efficient and centralized configuration, administration and control of Cambium WLAN networks.

Main functions:

- Web-based user interface
- Network discovery
- Configuration management
- Station assurance
- Network assurance
- Intrusion detection
- Real-time monitoring
- Wireless network mapping
- Drill-down reports
- Safety monitoring and management

On-premise installation

or
Cloud based management

BENEFITS AT A GLANCE

Less WiFi equipment

- up to 13.88 Gbps bandwidth
- higher range and coverage
- up to 780 users per array
- wireless mesh
- access points can be configured
- integrated Gigabit switch
- integrated WiFi controller

Security

- intelligence at the interface
- integrated firewall
- integrated WiFi threat sensor

Professional support

- measurement
- network planning
- monitoring

Investment protection

- new standards by means of software updates
- switchable between 2.4 and 5 GHz

NETWORK CONTROL

Due to an increasing number of devices and operating systems network designers have to select a solution which makes it easy to connect new devices.

GUESTS
Unknown user +
unknown devices

BYOD USERS
Known user +
unknown devices

EMPLOYEES
Known user +
known devices

IOT DEVICES
No user +
known devices

Cambium EasyPass provides a simple selection of access control solutions for the management, for SSO access of employees and students, for the integration of headless IoT devices and for various types of guest access. Administrators get detailed information about users and devices which access the network and can use various levels of control without the need of additional operational expenses.

SERVICES

Datwyler complements its services with professional support when measuring a building, designing the network and checking the network installed.

Site Survey

Measurement is carried out with the arrays directly in the building in which WiFi is to be installed.

Simulation

A simulation based on building plans or site maps is carried out to determine the number of HD Access Points required.

Checks

After the installation, the range and coverage is measured and the WiFi network is tested to guarantee the highest possible quality.

MAINTENANCE CONTRACTS

Protect your investment with a maintenance contract. This is the way to keep HD Access Points and software up to date at no extra cost.

Upgrade and update

Hardware upgrades and software updates ensure that your WiFi HD Access Points will always be fully compliant with the latest standards.

WiFi 6

WiFi 6 (802.11ax) increases the transmission speed, improves the efficiency and minimizes network congestion when using multiple devices.

Overview of the main advantages:

- up to 25% higher data throughput due to QAM 1024 modulation
- multi-user MIMO transmits various data streams to several WLAN clients at the same time
- transmission channels of up to 160 MHz for 4K streaming and VR applications
- OFDMA for bundling of small data packets and optimal utilization of radio cells

We shall be pleased to advise you and to find the best WiFi solution for you.

LONG-TERM SECURITY

Even the best matched systems can only show their optimal potential when the installation is optimised. With the increased technical demands of class E_A, class F and class F_A links, for example, the demands on the installer are constantly growing.

We train network installers in the Datwyler system solutions in order to be able to guarantee an optimal quality of installation. Our seminars provide participants with the knowledge of the right application for products, combinations and dependencies of different parameters in the cabling system, and the resulting high quality of installation in copper and fibre optic networking.

DATWYLER SYSTEM WARRANTY

Certified installers can offer a Datwyler warranty for the installed copper and fibre optic cabling systems: normally for 25 years, but this can be extended depending on project criteria.

An acceptance test for each link documents that all required electrical or optical values are maintained.

Cabling solutions from Datwyler consistently perform beyond the standards, guaranteeing excess headroom for future application support.

DATWYLER TRAINING

Nowadays simply selling good products and solutions is no longer enough. A high-tech field like ours needs a great deal of know-how.

In our training courses we pass on to you the knowledge and experience we have gained in international standardisation consortia and in collaboration with research and development partners. You can thus provide your own customers with system solutions of the highest level of expertise. The consistently high standard makes us mutually strong and competitive.

You will find individual course types and dates on our home page via the country selection in the "Training" menu.

- . Native speaker as contact person
- . Representatives in 70 countries
- . Excellent market knowledge and understanding of market conditions
- . Familiar with the local variances

ANYWHERE IN THE WORLD: **WE REALIZE YOUR PROJECT**

WE SPEAK
YOUR LANGUAGE
– ALSO FROM A
CULTURAL POINT OF VIEW

You will find us wherever IT infrastructures are involved.

Not only are we fluent speakers of all the major languages, but we're also well versed in the special cultural and application-specific features of each particular country. We are familiar with the rules and requirements and know what is important. This saves our international customers time and money. For they know that Datwyler's development, production and quality control, geared to the specific criteria of the domestic market, give them significant competitive advantages.

And they are sure to feel "at home" if they are then given advice and support in their native language into the bargain.

-  **Headquarters**
-  **Manufacturing plant**
-  **Offices**
-  **Active market presence by Datwyler and their distribution partners**

**Are you searching for a distribution partner in one of our export markets?
