

# Upwards with Woertz

## Flat cable system for electrical installations in lift shafts

### AT A GLANCE

- Guaranteed flexibility and space-saving installation also in the case of vertical installations
- Minimal risk – pre-configured and pre-mounted flat cable systems save assembly time in the lift shaft
- Increased safety by means of self-blocking cable clamps
- Lighting components are quick and easy to place at the required points

 Swiss made

# Flat cables for lifts

## Turnkey solution for electrical installations in lift shafts

Woertz flat cable systems provide maximum flexibility for lift and electrical installation companies, enabling them to also fulfil short-notice adaptation requirements and change requests. Being able to use pre-assembled products simplifies the installation significantly, thereby creating real value-add.

Woertz AG – inventor of flat cables – offers a long-awaited turnkey solution for any lift shaft installation. Take advantage of all the benefits of combining flat cables with appropriate connector boxes. Typical Swiss Made – typical Woertz.

# DALI cabling system 3G 2.5 mm<sup>2</sup> + 2 × 1.5 mm<sup>2</sup>

- For more efficient working
- Save valuable installation time on site

- Flexible and easily extendible installation
- Quick commissioning due to pre-assembly
- Lower operating costs and reduced energy consumption
- Lower cable volume and therefore minimised fire load
- Unique installation safety through system coding
