

NEW iDACS Network MoT

Network MoT 'health checks' are offered exclusively by iDaC Solutions (iDACS) as a supplementary service for clients with a Datwyler 25-year System Warranty.

The free service is available for all sites that were warranted over three years ago and for new sites on the third anniversary of site certification (an additional MoT can be requested after a further 4 years).

What's included in the iDACS Network MoT ?

A visual inspection by our Technical Director and the Datwyler Certified Installer (CI); for general wear and tear, MAC's and Environmental considerations. A site review report from iDACS, with observations, recommendations and suggested works. Repairs or replacement of products by iDACS / Datwyler CI - with prior agreement of the client. This may be subject to costs* if not covered under the Datwyler system warranty.

A review of network support for new applications e.g. smart building solutions, Li-Fi etc.

How does the iDACS Network MoT compare with other System Warranties?

Warranty Features	Other Warranties	Datwyler
25 Year Cover	✓	✓
Permanent link warranty	✓	✓
Copper & Fibre	✓	✓
Site audits prior to completion	✓	✓
Only test 'PASSED' warranted	✓	✓
Replacement of faulty parts	✓	✓
Overlength warranty for eligible links	?	✓
Network MoT from iDACS		
Free network health check after 3 years	X	✓
Visual inspection of connecting hardware	X	✓
Site report with recommendations / observations	X	✓
Agreed repairs, MAC's & certification of additional works	X	✓

* Faulty connectivity would be covered under the system warranty (subject to conditions).

Benefits of the iDACS Network MoT

The Datwyler System warranty, with unique iDACS MoT service, offers clients true peace-of-mind that their network will be reviewed regularly and operate efficiently throughout its life-span. Potential issues can be identified and rectified before they become major problems in the future. New links and eligible MACs can be certified and added to the system warranty. We can offer guidance on how to improve operational efficiency & reduce operating costs by using new applications or upgrading critical links

Will the MoT be disruptive?

No, as we won't be interfering with the warranted / active systems. The service will be carried out at a time convenient to you, our client.

Why should I deal with iDACS?

As the exclusive source of Datwyler products in the UK&I, iDACS is your point of contact for anything warranty related, either directly or through your installer.

The health check service is completely separate to the warranty & is only available from iDACS.

Contact us today for case study examples, or to find out how we can transform your business with smart building infrastructure solutions that reduce operating costs & support your future growth.
